DIRECTION FOR USE

GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

NO PRESLAUGHTER WITHHOLDING PERIOD IS REQUIRED.

SOWS, BOARS AND BREDDING GILTS: Mix 10 lb. of VTM Premix-I per ton of meal type feed and offer 4.6 lb. of feed per animal per day. This is equivalent to 45 mg. of RABON® per lb. of feed.

Start feeding VTM Premix-I early in the spring before flies begin to appear and continue feeding throughout the summer and into the fall until cold weather restricts fly activity.

All swine should be treated, VTM Premix-I prevents development of house flies in the manure from treated swine but is not effective against existing adult flies.

In some cases, supplemental fly control measures may be needed in and around the area to control adult flies which move in from other areas or which breed on decaying vegetable matter elsewhere on the premises.

In order to achieve optimum fly control, VTM Premix-I should be used in conjunction with other good management and sanitation practices.

STORAGE AND DISPOSAL
