DIRECTIONS FOR USE  
GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a  
manner inconsistent with its labeling.

**MICROBIOCIDAL SERIES 303** is used to control algae, bacteria,  
and fungi in recirculating commercial and industrial water  
cooling towers. Prior to its use, systems must be cleaned to  
remove algal growth, microbiological slime, and other deposits.

An initial slug addition of 2.9 to 7.3 fluid ounces of  
**MICROBIOCIDAL SERIES 303** per 1000 gallons of water to provide  
a concentration of 24 to 60 parts per million of **MICROBIO-**  
**CIDAL SERIES 303**, based on the total weight of water in the  
system, is recommended. Repeat initial dosage until control  
is evident.

Subsequent slug additions of 0.73 to 8.3 fluid ounces of  
**MICROBIOCIDAL SERIES 303** per 1000 gallons of water (6 to 60  
parts per million of **MICROBIOCIDAL SERIES 303**) should be em-  
ployed every 2 to 5 days or as needed. The frequency of  
addition depends upon the relative amount of bleedoff and the  
severity of the microbiological problem. Slug additions  
should be made in the sump of water cooling towers.

## STORAGE AND DISPOSAL

Keep container closed when not in use. Do not contaminate  
water, food, or feed by storage, disposal, or cleaning of  
equipment. Do not reuse empty container. Triple rinse (or  
equivalent) and dispose of container in an incinerator or in  
an approved landfill, or bury in a safe place. Rinseate that  
cannot be used or reprocessed should be disposed of in a  
landfill approved for pesticides or buried in a safe place  
away from water supplies. Open dumping is prohibited.
