## "FOR SWIMMING POOL CHLORINATION AND SANITIZING."

ACTIVE INGREDIENT  
SODIUM HYPOCHLORITE 9.2%  
INERT INGREDIENTS 90.8%

## KEEP OUT OF REACH OF CHILDREN DANGER

**FIRST AID:** If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk, or gelatin solution or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

See additional precautions on side panel

## DIRECTIONS FOR USE GENERAL CLASSIFICATION

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT  
IN A MANNER INCONSISTENT WITH ITS LABELING

### DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start up, superchlorinate with one (1) ounce of this sodium hypochlorite solution for each 2500 gallons of water. This dosage is equivalent to 5 ppm available chlorine by weight.

**For Pool Maintenance:**  
A) Adjust pool water pH to 7.6 - 7.8 and maintain.  
B) Add manually or by a feeder device this sodium hypochlorite solution to maintain an available chlorine residual of 1.0 to 1.2 ppm. One (1) ounce of this sodium hypochlorite solution for each 6000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of addition to maintain 1.0 to 1.2 ppm available chlorine will depend upon temperature and other pool variables. Use test kit to make certain the pH and chlorine residual are in the proper range.

### DIRECTIONS FOR DISINFECTION OF POTABLE WATER FOR HOME WELL WATER SYSTEMS

Dilute this sodium hypochlorite solution in the ratio of one part of sodium hypochlorite solution to 9 parts softened water. Mix sodium hypochlorite solution and water thoroughly and begin feeding of solution with a hypochlorinator or metering pump. Maintain a free available chlorine residual of at least 0.2 ppm and no more than 0.6 ppm throughout the distribution system as determined by a DPD chlorine test kit. Bacteriological sampling must be conducted at a frequency of one (1) time per month as required by the National Interim Primary Drinking Water Regulations. The water being sampled with a DPD chlorine test kit.

**DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT**  
Clean equipment in the normal manner. Just before using, rinse all surfaces thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Addition of one fluid ounce (2 tablespoons) of this sodium hypochlorite solution per 4 gallons of water will provide approximately 200 ppm available chlorine by weight.

**NOTE:** This product degrades with age. Use a chlorine test kit at the time of storage as necessary to obtain the required level of available chlorine.

**STORAGE AND DISPOSAL:** Store in a cool dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collector or burning in an approved landfill. Product or residue that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or food by contact with or disposal of cleaning equipment.
