All Pure Chemical Company
P.O. Box 268
Tracy, CA 95376-0268

Gentlemen:

Subject: Purechlor Sanitizer
EPA Registration No. 37982-1
Your Submission Dated March 17, 1986

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), is acceptable provided that you:

1. Make the labeling changes in accordance with the enclosed edited label before you release the product for shipment bearing the amended labeling.
2. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Jeff Kempter
Acting Product Manager (32)
Disinfectants Branch
Registration Division (TS-767C)

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

STORAGE AND DISPOSAL

Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment. Return container to manufacturer for deposit refund.

SWIMMING POOL WATER DISINFECTION

For a new pool or spring start-up, superchlorinate with 52 to 104 oz. of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Adjust and maintain pool water pH to between 7.2 to 7.8. Adjust and maintain the alkalinity of the pool to between 50 to 100 ppm.

To maintain the pool, add manually or by a feeder device 11 oz. of this product for each 10,000 gallons of water to yield an available chlorine residual between 0.6 to 1.0 ppm by weight. Stabilized pools should maintain a residual of 1.0 to 1.5 ppm available chlorine. Test the pH, available chlorine residual and alkalinity of the water frequently with appropriate test kits. Frequency of water treatment will depend upon temperature and number of swimmers.

Every 7 days, or as necessary, superchlorinate the pool with 52 to 104 oz. of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Do not reenter pool until the chlorine residual is between 1.0 to 3.0 ppm.

At the end of the swimming pool season or when water is to be drained from the pool available chlorine must be allowed to dissipate from treated pool water before discharge. Do not superchlorinate the pool within 24 hours prior to discharge.

in EPA File # 1224

SWIMMING POOLS - While water is still clear & clean, apply 3 oz. of product per 1000 gallons, while filter is running, to maintain a 3 ppm available chlorine residual, as determined by a suitable test kit. Cover pool, prepare heater, filter and other components for winter by following manufacturers' instructions.

SPAS

3798251
Spas Maintenance Dosage: Apply 5 1/2 oz. of product per 1000
gallons of water to obtain a free available chlorine concentration
of 5 ppm, as determined by a suitable available chlorine test
kit. Adjust and maintain pool water pH to between 7.2 and 7.8
kit. Some oils, lotions, fragrances, cleaners, etc. may cause foaming
or cloudy water as well.

FOR START UP: apply 10 oz. of product per 1000 gallons of
water (equivalent to 10 ppm available chlorine) uniformly over
the surface. Make minor adjustments if necessary to establish
a free available chlorine residual of 10 ppm.

FOR SHOCK TREATMENT (Superchlorination); or after each use:
add 16 oz. of product per 1000 gallons of water to control odors
and/or algae (for outdoor spas). Do not use spa until free
available chlorine drops to 5 ppm or less. Use a suitable
available chlorine test kit to establish proper residuals.

During extended periods of disuse add 3 oz. of product per 1000
gallons to maintain a free available chlorine residual of 3 ppm.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMAN AND DOMESTIC ANIMALS

DANGER: Corrosive, may cause severe skin and eye irritation
or chemical burns to broken skin. Causes eye danger. Wear
Safety glasses or goggles and rubber gloves when handling this
product. Wash after handling. Avoid breathing vapors.
Vacate poorly ventilated areas as soon as possible. Do
not return until strong odors have dissipated.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes
streams, ponds or public waterways unless in accordance with
a NPDES permit. For guidance, contact the regional office of
the U.S. Environmental Protection Agency.

PHYSICAL OR CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Mix only with water according to label
directions. Mix this product with chemical (e.g. ammonia, acids,
detergents, etc.) or organic matter (e.g. urine, feces, etc.)
will release chlorine gas which is irritating to eyes, lungs
and mucous membranes.
