

HAZARDOUS MATERIALS STATEMENTS

Hazards to humans and domestic animals

WARNING

CAUSTIC- may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. May be fatal if swallowed. Avoid breathing vapors. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when mixing. Wash hands thoroughly after handling. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

Environmental Hazards:

This disinfectant is toxic to fish. Keep out of lakes, streams, ponds, and public waters unless a discharge permit is obtained. For guidance contact the regional office of the U.S. Environmental Protection Agency or All Pure Chemical Co.

Physical and chemical hazards:

SHOCK; OXIDIZING AGENT

Mix only with water according to label directions. Mixing this product with gross filth, such as feces, urine, etc. or with ammonia, acids, detergents, or other chemicals will release hazardous gases irritating to eyes, lungs, and mucous membranes.

STOP! Before opening and using this product, read and understand the entire label.

STORAGE AND DISPOSAL

Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not reuse container but place in trash collection. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

SHOCK 'U' SPARKLE

For Shock Treating Spas and Hot Tubs

Active ingredient: Sodium Hypochlorite.....7.01
Inert Ingredients.....91.01
Total.....100.01

KEEP OUT OF REACH OF CHILDREN
DANGER

First aid: If swallowed, drink large quantities of gelatin solution or milk. If these are unavailable, drink large quantities of water. Do not give vinegar or other acids. Do not induce vomiting. Get prompt medical attention. If on skin, wash with plenty of water. If in eyes, flush with water for 15 minutes. Get prompt medical attention. See additional precautions on back label.

DIRECTIONS FOR USE:

STOP! Read and understand the entire label before opening and using this product.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Every 7-10 days during periods of frequent usage, spas and hot tubs should be shock treated, that is treated with a larger dosage of chlorine than normal maintenance or in-use treatments. Shock treatment is also desirable whenever the water loses its crystal clear sparkle or whenever contamination may have occurred, e.g., rain, wind, leaves and garden debris, body oils, urine, etc.

Add 6 ounces per 500 gallons while filter and pump are running. Continue to run for 4 hours. Repeat this treatment if chlorine residual is less than 2.0 ppm after 4 hours. Do not use spa or hot tub until chlorine residual is in the normal range. Do not worry if residual is higher than normal. Chlorine residuals decrease with time, temperature, and sunlight.

Maintain pH in the 7.2-7.6 range. Maintain chlorine residual in the 2.0-3.0 ppm range when in use and between 1.0-3.0 ppm when not in use.

If spa or hot tub water is still cloudy after treatment, check filter for leakage.

Determine pH and available chlorine residual by testing water with a reliable test kit with fresh chemicals.
