

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with a NDPE Permit. For guidance, contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENTS: Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnant of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reassemble container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

ALL PURE SPA SHOCK

For start up and special algae problems

Active Ingredient.....Lithium Hypochlorite.....~~35%~~ 36% 10  
Inert Ingredients .....~~65%~~ 71% 9/8  
Available Chlorine.....~~35%~~ 24

KEEP OUT OF REACH OF CHILDREN  
DANGER

Practical treatment (first aid):  
If swallowed, feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin, brush off excess chemical and flush skin with water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention. See additional precautions on side panel.

Net Weight: 5 Pounds

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product is recommended for establishing an initial chlorine residual in freshly filled spas, hot tubs and other therapeutic water. It is also used for periodic super-chlorination to re-establish a chlorine residual, restore sparkle and remove contamination after heavy use. Spa Shock contains no calcium, which may increase water hardness, causing scaling on spa surfaces, in heaters and in water circulating lines.

First, adjust pH to 7.4-7.6. Second, add 2 ounces per 500 gallons while pump and filter are on and continue to circulate water 2 hours. Check available chlorine. If residual is below 1.0 ppm, repeat Steps 1 and 2 above. If available chlorine is in the 1.0-3.0 ppm range, water is ready for use and regular application of normal chlorinating chemical. If chlorine residual is above 3.0, do not use water nor add additional chlorinating chemical until residual is in ideal 1.0-3.0 ppm range. If residual cannot be established after 2 treatments, dump water and establish residual in freshly filled spa. With normal use, spas, hot tubs, etc. need a complete water change every 3-6 months, unless they are connected to the circulation system in a large swimming pool.

STORAGE AND DISPOSAL:

Keep product in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.
