

**PRECAUTIONAL STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, or ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS, STRONG OXIDIZING AGENT: Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat and open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose of in an approved landfill area, or bury in a safe place.

PURECHLOR DRY ALGAECIDE

**DESTROYS BLACK ALGAE IN
SWIMMING POOL WATER**

Active Ingredient: trichloro-
s-triazinetriol 99.0%
Inert Ingredients: 1.0%

Available chlorine: 90.0%

EPA REG. NO. 37982-
EPA EST. NO. 37982-CA-1

KEEP OUT OF REACH OF CHILDREN

DANGER!

PRACTICAL TREATMENT (First Aid):
If swallowed, feed bread soaked in milk followed by olive or cooking oil. Call a physician immediately. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

See additional precautions on side panels of this label.

It is a violation of Federal law to use this pesticide in a manner inconsistent with its labeling.

PURECHLOR DRY ALGAECIDE is a concentrated granular chlorinating material which is used for spot algae control and generalized treatment. It should be used occasionally, and never in the place of regular chlorination. Do not use on painted pool surfaces or in vinyl lined pools. Stains may result.

USE DIRECTIONS: Black algae generally appear as spots either on the sides or bottom of the pool. These spots usually are isolated. Severe infestations will have numerous spots throughout the pool surfaces.

Adjust pH of pool to 7.2-7.6.

Check available chlorine. Add chlorinating chemical as needed to achieve 1.5-3.0 residual.

Turn off filter and pump. Allow water to settle. **DO NOT SWIM IN POOL** or turn on filter until the treatment is completed.

For isolated spots on side wall, place 1 tablespoon of PURECHLOR in a muslin or cheese-cloth square, tie ends with string, and hang from the side of the pool adjacent to the spot. For isolated spots on bottom, place pool pole over spot, and drop 1 tablespoon PURECHLOR down tube. Wait for algaecide to settle on bottom. For generalized infestation, broadcast PURECHLOR across pool surface at rate of 1 lb/400 square feet.

24 hours after application of PURECHLOR, brush algae spots with wire brush. When necessary, vacuum away algae debris. If spots remain, repeat application.

When treatment is finished, start up pool water system and leave pump and filter on for four hours. Check chlorine residual and pH with a reliable test kit. If pool is in balance (pH 7.2-7.6), available chlorine 1.5-3.0 ppm) commence swimming. If pool is out of balance, adjust with usual chemicals. **DO NOT ENTER** if chlorine residual is above 3.0 ppm.

Black algae spots occur in a neglected pool. Check chlorine residual and pH daily, or as needed, to maintain pool in swimming condition.
