CHLORINATING SOLUTION

ACTIVE INGREDIENT:
SODIUM HYPOCHLORITE 9%
INERT INGREDIENTS: 91%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk, or gelatin solution or, if these are not available, drink large quantities of water. Do not give vinegar or other acids. Do not induce vomiting. Get prompt medical attention.

DIRECTIONS GENERAL CLASSIFICATION

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR SWIMMING POOLS

For a new pool or for spring start-up, add one half pint (16 flu. ozs.) of sodium hypochlorite solution for each 6000 gallons of water. This dosage is based on available chlorine by weight.

FOR POOL MAINTENANCE:

- A) Adjust pool water pH to 7.6 - 7.8.
- B) Add manually or by a feeder, sodium hypochlorite solution at a rate to maintain an available chlorine by weight of 0.6 to 1.0 ppm. One half pint (8 flu. ozs.) of sodium hypochlorite solution for each 6000 gallons of water. Maintain 0.6 to 1.0 ppm available chlorine by weight, temperature and of number swimmers. Adjust pH and chlorine residual.

NOTE: This product degrades with sunlight. Increase dosage as necessary, based on available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry place, away from direct sunlight. In case of spill, flood with water. Rinse empty container thoroughly. Do not return to manufacturer or discard by burning in an approved land fill. Product used, should be diluted with water and disposed in sewer. Do not contaminate food or clothing. Clean up thoroughly after cleaning of equipment.

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start-up, superchlorinate with one (1)
pint (16 flu. ozs.) of sodium hypochlorite solution for each 2500
gallons of water. This dosage is equivalent to 5 ppm available
chlorine by weight.

FOR POOL MAINTENANCE:

- A) Adjust pool water pH to 7.6 - 7.2 range and maintain.
- B) Add manually or by a feeder device, sodium hypochlorite
solution at a rate to maintain an available chlorine residual of
0.6 to 1.0 ppm. One half pint (8 flu. ozs.) of sodium hypochlorite
solution for each 6000 gallons of water will provide 1.0 ppm
available chlorine by weight. Frequency of additions to
maintain 0.6 to 1.0 ppm available chlorine will depend on
temperature and of number swimmers. Use test kit to make
certain the pH and chlorine residual are in the proper range.

NOTE: This product degrades with age. Use a chlorine test kit and
increase dosage as necessary, to obtain the required level of
available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry area away from
direct sunlight. In case of spill, flood area with large quantities of
water. Rinse empty container thoroughly with water and either
return to manufacturer or discard by placing in trash collection or
burying in an approved land fill. Product or rinsate that cannot be
used, should be diluted with water and disposed of in a sanitary
sewer. Do not contaminate food or feed by storage, disposal or
cleaning of equipment.
