We are forwarding your request for voluntary cancellation of registration 38167-1 to our records branch for processing. A pesticide is considered misbranded if offered for sale under the name of another pesticide [FIFRA sec. 2(q)(1)(c)].

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

PROTECTIVE CLOTHING REQUIRED: Wear protective clothing when handling or applying this product including long pants, long-sleeve shirt, and impermeable gloves and boots. Mixer-loaders should include an apron and full-face shield when handling or mixing concentrate. Flagmen should be fully protected during spray operations or mechanical flagmen used. Pilots and ground spray rig applicators should wear a mask or respirator approved by the Mining Enforcement and Safety Administration and the National Institute for Occupational Safety and Health.

APPLICATION DIRECTIONS

Setre Bladex-MSMA herbicide is effective as a directed postemergence treatment for the control of certain broadleaf weeds *and grasses*. Bladex-MSMA herbicide may be used in Alabama, Arkansas, Georgia, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Gulf Coast, Coastal Bend and Blacklands only.

*on Bladex

det-352*

(Bladex-MSMA herbicide may be applied postemergence following a preemergence application of Bladex. For coarse soils, apply no more than one postemergence and one preemergence application to the same crop in any one year. For medium and fine soils, apply no more than two postemergence and one preemergence application to the same crop in any one year.

MIXING AND SPRAYING

Application equipment should be thoroughly cleaned if another pesticide has been previously used.

Sufficient agitation should be provided during the filling operation and application to insure uniform mixing. Fill the spray tank with one-half (1/2) full of clean water and while pump and agitator are running, add the recommended amount of Bladex-MSMA herbicide. Fill with water to desired level.

(Allow the spray mixture to agitate for several minutes prior to application. If the mixture is allowed to stand in a spray tank or nurse tank for an extended period of time (several hours to overnight), agitate for several minutes prior to application.

Apply with flat fan nozzles (even distribution flat fan for band application) with 50 mesh nozzle and in-line screens. Apply at 20-40 psi and avoid drift. Apply in properly calibrated spray equipment.

COTTON: Directed Postemergence: Apply Setre Bladex-MSMA herbicide after cotton is 6 inches tall but before first bloom, and before weeds are 2 inches tall. The spray should be directed to the soil around the base of the cotton plants, taking care to prevent spraying of cotton foliage, as injury will occur. Maximum coverage of uses is important for good control. Apply 1.2-2.0 quarts broadcast, 0.4-0.6 quarts on a 12 inch band and 0.6-1.0 quarts on a 19 inch band (38 inch rows) in 15-30 gallons of spray solution per sprayed acre. Addition of an approved (40 CFK .180 .1001) nonionic spreader surfactant at a rate of 1-2 quarts per 100 gallons of water (as directed by manufacture) is recommended.

Weeds Controlled: Cocklebur, prickly sida (leaved), annual morninglory (tall, smallflower, small white, ivyleaf), pigweed (redroot, sping), Johnsongrass, nutgrass, watergrass, goosegrass, dallisgrass and spotted spurge.

Do not graze or feed foliage from treated areas to livestock.
