U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Antimicrobials Division (7510C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number:
38422-~~R~~1

Date of Issuance:
Oct. 11, 2002

NOTICE OF PESTICIDE:

Registration
 Reregistration

(under FIFRA, as amended)

Term of Issuance: Conditional

Name of Pesticide Product:
Destain Sanitizer

Name and Address of Registrant (include ZIP Code):

Advanced Dishwashing Service
1740 Heightsview Drive
P.O. Box 96
Houghton Lake Heights, MI. 48630

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Antimicrobials Division prior to the use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA Sec. 3(c)(7)(A) provided you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA Sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Revise the EPA File symbol 38422-R to EPA Registration Number 38422-1.
3. Insert the following sentence in the Poison Control Center box:
"Have the product container or label with you when calling a poison center or doctor, or going for treatment."
4. After "Hazards to humans and domestic animals:" add the signal word: DANGER.
5. Submit two copies of the revised final printed label for our records before shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e).

Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Two ounces of this product in 5 gallons of water is equivalent to 200 parts per million (ppm) available chlorine. **TO SANITIZE DISHES, GLASSWARE, UTENSILS:** Wash thoroughly; then soak 1 minute in solution of one tablespoon of Destain Sanitizer to each gallon of hot water. Use chlorine test strips to adjust to 200 ppm available chlorine. Drain dry. (Do not use on steel, aluminum, silver or chipped enamel)

TO USE IN SANITIZING CYCLE OF CHEMICAL SANITIZING DISHWASHING MACHINES:

1: Hook up container to the automatic sanitizer dispensing system of the chemical sanitizing dishwashing machine. If the container is already in place, make sure that sufficient product remains in the container to complete the dishwashing job.

2: Wash tableware in the machine following the manufacturer's operating instruction.

3: After the washing/rinsing/sanitizing cycles are completed, remove the dishwashing rack. Let stand 2 minutes. Allow the tableware to air dry.

Dispensing System Adjustments: The following steps must be followed before using the new chemical sanitizing dishwashing machine, and on a regular basis thereafter:

- Start machine and let run until the machine has begun the final rinse cycle.
- Take a sample of the rinse water.
- Using a chlorine test kit, determine the part per million (ppm) of available chlorine in the sample.
- If the ppm of available chlorine is lower than the minimum or higher than the maximum level of available chlorine permitted by local public health authorities, adjust the chlorine dispensing system.
- Repeat step "a" through "c" until a correct ppm of available chlorine is achieved.
- Your Advanced Dishwashing Service Representative will make these adjustments for you..

Correct Chlorine Concentration

Local public health codes vary with regard to the parts per million of available chlorine permitted in the final rinse water of chemical sanitizing dishwashing machines. The minimum level is 50 ppm of available chlorine with a maximum level of 200 ppm, although some states require 100 ppm minimum level. Check with your local public health department on the applicable regulations for your area.

ACCEPTED
m EPA Letter Dated:

OCT 11 2002

Under the Federal Insecticide, Fungicide, and Rodenticide Act
EPA Reg. No. 38422-1

PRECAUTIONARY STATEMENTS

FIRST AID

If in eyes	<ul style="list-style-type: none"> Hold eye open and rinse slowly and gently with water for 15-20 minutes Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice
If on skin or clothing	<ul style="list-style-type: none"> Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes Call a poison control center or doctor for treatment advice.
If swallowed	<ul style="list-style-type: none"> Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Hazards to humans and domestic animals: **DANGER**
Cancer substantial but temporary eye injury. Do not get in eyes or on clothing. Harmful if swallowed. May irritate skin. For prolonged use wear gloves.

Physical and Chemical Hazards:
This product contains a strong oxidizer.
Do not use or mix with other household chemicals, such as toilet bowl cleaners, rust removers, acid or ammonia containing products. To do so will release hazardous gases. Do not allow undiluted Destain Sanitizer to come in contact with any fabric. Do not use Destain Sanitizer on steel, aluminum, silver or chipped enamel. Prolonged contact with metal may cause pitting or discoloration.

Environmental Hazards: Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.

Storage and Disposal: Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not use this empty container for storage of any other chemicals. Be sure all closures are replaced on empty container.
