U.S. ENVIRONMENTAL PROTECTION AGENCY

Office of Pesticide Programs
Antimicrobials Division (7510-P)
1200 Pennsylvania Avenue N.W.
Washington, D.C. 20460

EPA Reg. Number:

38422-2

Date of Issuance:

Jan. 5, 2010

Term of Issuance:

Conditional

Name of Pesticide Product:

ADS Sanitizer

NOTICE OF PESTICIDE:

[x] Registration
Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Advanced Dishwashing Service, Inc.
9280 Knapp Road
P.O. Box 429
Houghton Lake, MI. 48629

Note: Changes in labeling, differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Antimicrobials Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product (OPP Decision No. 421547) is conditionally registered in accordance with FIFRA sec 3(c)(7)(A) provided that you:

- 1. Submit and/or cite all data required for registration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and, submit acceptable responses required for re-registration of your product under FIFRA section 4.
2. Change EPA File Symbol 38422-E to EPA Registration Number 38422-2.

Submit one copy of the finished final printed label prior to releasing this product for sale.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e).

Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the conditionally approved label is enclosed for your records.

Signature of Approving Official:

Wanda Y. Henson
Acting Product Manager 32
Antimicrobials Division (7510-P)

Date:

ACTIVE INGREDIENT.....Sodium hypochlorite.....5.25%
 OTHER INGREDIENTS.....94.75%
 Total.....100.00%

For Institutional Use

FIRST AID

IF IN EYES	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF SWALLOWED	Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person..
Poison Control Center 800-764-7661 Note to Physician	Have the product container or label with you when calling a poison center or doctor, or going for treatment. Probable mucosal damage may contra-indicate the use of gastric lavage.

EPA Registration NO. 38422-E

Manufactured by

Epa Est. NO. 038422-MI-001

Advanced Dishwashing Service, Inc.
 9280 Knapp Road
 Houghton Lake, MI 48629
 800-348-4333

ACCEPTED
 JAN 05 2010
 Under the Federal Insecticide, Fungicide, and Rodenticide Act, this product is registered under EPA Reg. No. 38422-2

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals:

DANGER: Corrosive

Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Harmful if swallowed. May irritate skin. For prolonged use wear gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using bathroom.

Physical and Chemical Hazards: This product contains a strong oxidizer.

Do not use or mix with other household chemicals, such as toilet bowl cleaners, rust removers, acid or ammonia containing products. To do so will release hazardous gases. Do not allow undiluted ADS Sanitizer to come in contact with any fabric. Do not use ADS Sanitizer on steel, aluminum, silver or chipped enamel. Prolonged contact with metal may cause pitting or discoloration. Vacate poorly ventilated areas.

Environmental Hazards: This product is toxic to fish.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Two ounces of this product in five gallons of water is equivalent to 200 parts per million (ppm) available chlorine.

TO SANITIZE DISHES, GLASSWARE, UTENSILS: Wash thoroughly; then soak 1 minute in solution of one tablespoon of ADS Sanitizer to each gallon of hot water. Use chlorine test strips to adjust to 200 (ppm) available chlorine. Drain dry. (Do not use on steel, aluminum, silver or chipped enamel)

TO USE IN SANITIZING CYCLE OF CHEMICAL SANITIZING DISHWASHING MACHINES:

1: Hook up container to the automatic sanitizer dispensing system of the chemical sanitizing dishwashing machine. If the container is already in place, make sure that sufficient product remains in the container to complete the dishwashing job.

2: Wash tableware in the machine following the manufacturer's operating instruction.

3: After the washing/rinsing/sanitizing cycles are completed, remove the dishwashing rack. Let stand 2 minutes. Allow the dishes, glassware, and utensils to air dry.

Dispensing System Adjustments: The following steps must be followed before using the new chemical sanitizing dishwashing machine, and on a regular basis thereafter:

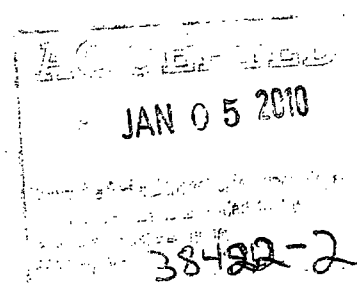

- a. Start machine and let run until the machine has begun the final rinse cycle.
- b. Take a sample of the rinse water.
- c. Using a chlorine test kit, determine the part per million (ppm) of available chlorine in the sample.
- d. If the (ppm) of available chlorine is lower than the minimum or higher than the maximum level of available chlorine permitted by local public health authorities, adjust the chlorine dispensing system.
- e. Repeat step "a" through "c" until a correct (ppm) of available chlorine is achieved.
- f. Your Advanced Dishwashing Service Representative will make these adjustments for you.

Local public health codes vary with regard to the parts per million of available chlorine permitted in the final rinse water of chemical sanitizing dishwashing machines. The minimum level is 50 ppm of available chlorine with a maximum level of 200 (ppm) although some states require 100 (ppm) minimum level. Check with your local public health department on the applicable regulations for your area.

Storage and Disposal: Do not contaminate water, food or feed by storage and disposal, or cleaning of equipment. Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. (Refillable container) Refill this container with Sodium Hypochlorite only. Do Not reuse this container for any other purpose. Triple rinsing the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. Follow standard industry practices for cleaning refillable containers. Be sure all closures are replaced on empty containers. Offer for recycling if available or return for deposit. **RETURN** empty container to **Advanced Dishwashing Service** 9280 Knapp Road, Houghton Lake, MI 48629
