GENERAL INSTRUCTIONS

Do not let the liquid come in contact with susceptible plants, such as vegetables, flowers, fruit trees, ornamentals, cotton, grapes or other desirable plants or allow spray mists to drift into these plants (coarse sprays are less likely to drift). This product is a liquid non-selective, general herbicide which is designed to be used where control of all vegetation is desired. It produces rapid top kill of all succulent vegetation. Translocation and root absorption produce extensive root kill of weeds and provide long term control. For easy application and better penetration dilute one gallon of AC-1-10 to 10 gallons of water and apply as directed below. Sufficient moisture from rainfall or artificial means is necessary after treatment to carry the chemical into the root of the weeds. This product is recommended for non-crop areas such as RAILROADS, HIGHWAYS, PIPELINES, TANK FARMS, LUMBER YARDS, FENCE ROWS AND PARKING LOTS. AC-1-10 can be sprayed or sprinkled on. If sprayed, direct the spray to the soil at the base of the weeds and adjust for coarse spray to prevent drifting. Thoroughly clean spray equipment with a suitable chemical cleaner before using for other purposes or do not use same spray equipment for other purposes. Do not apply when weather conditions favor drift from areas treated. Apply this product only as specified on the label.
