

STORAGE: Keep container closed when not in use. Store in cool place. Leaking or damaged containers should be placed in a plastic bag and discarded in trash. All pesticides should be kept out of reach of children and stored away from food.

DISPOSAL: Do not reuse empty can. Wash can and place in trash.

EXTRACTIVE BLEEDING: This bleeding may be unsightly but is not damaging to the stain. If extractive bleeding has occurred, allow the coating to dry then wash with a mild detergent solution and rinse with water.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

WARNING: Causes eye damage and skin irritation. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when applying. Harmful if swallowed or absorbed through skin. Avoid breathing vapors or spray mist. This product may cause skin sensitization. Use only in a well ventilated area.

STATEMENT OF PRACTICAL TREATMENT: In case of skin contact, wash promptly and thoroughly with soap and water. If product gets in eyes, flush immediately with copious amounts of clean, cool water for 15 to 20 minutes. Get medical attention immediately. If product is swallowed, call a physician or Poison Control Center. Drink a large quantity of milk, egg whites, or gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol.

NOTE TO PHYSICIAN: Probable microbial damage may contraindicate the use of gastric lavage. Measure against circulatory shock, respiratory depression, and convulsion may be needed.

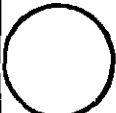

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not apply directly to water. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public water. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: Do not use or store near heat or open flame. **COMBUSTIBLE.**

LIFE'S
"WEATHERFIGHTER"
OIL FINISH

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its label.

PRODUCT DESCRIPTION: Life's "Weatherfighter Exterior Oil-Finish" is a new chemical formulation that penetrates deep into the wood fibers to guard against rot, decay and mold. It will preserve and enhance the natural grain and beauty of wood while protecting and sealing it. The special water repellents help seal out moisture to retard warping, swelling and shrinkage of wood. Used as a semi-transparent finish, Life's Exterior Oil-Finish will filter more than 90% of the sun's ultraviolet rays.

APPLICATION: Mix thoroughly before use. Do not thin. Apply by brushing, spraying or rolling. The most effective treatment is obtained by extended coating where deep penetration and high absorption are obtained. Use extra care to saturate joints and exposed wood end grain for more effective protection. Allow at least five minutes soak time for each inch of board thickness. When spraying with paint sprayer equipment use low pressure setting. Wear an organic vapor mask and suitable eye protection. Avoid spraying vegetation.

RECOMMENDED SURFACE: Exterior use only. Use above ground, unshaded wood: decks, fences, siding, decks, stables, outdoor furniture and structural lumber.

DRYING TIME: Allow 24 hours or more before painting with oil base paints. Use an oil base primer before applying latex paints. Allow to weather 6-12 months if latex paint is to be applied directly over the Weatherfighter.

CLEAN-UP: Clean equipment with paint thinner.

THINNING: Thinning is not necessary.

COVERAGE: Coverage varies by species and density of wood. Allow 100-200 square feet per gallon.

ADVANTAGES: 1. Wood Preservative - Controls rot, stain, mold and inhibits attack by termites. 2. Water Repellent - Controls warping and swelling. 3. Paintable.

It is a violation of federal law to use this product in a manner inconsistent with its label.

GENERAL PREPARATION: Wood must be clean, dry and free from old finishes. All cuttings should be completed before application. Do not paint over mold. If mold is present, scrub area with a solution of 1 part household bleach and 3 parts water. Let stand 20-30 minutes, rinse with clear water, then allow to dry thoroughly.

IMPORTANT: This product is not intended to treat wood used by food, feed, potable water, living plants and animals contact surfaces. Treated wood will weather naturally and produce graying and contrasting tones depending upon its exposure. The results of weathering will vary with different exposures and different natural extractives in wood which can produce uneven tones.

Neither the manufacturer nor the seller makes any representation or warranty, expressed or implied, concerning this product except that it is of the manufacturer's standard quality. Neither shall be held responsible in any manner for any personal injury, property damage or other type of loss resulting from the improper handling, storage and use of this product. The buyer accepts and uses this product on these conditions.
