PRINTED IN U. S. A.

**DIRECTIONS**

The following general directions are supplied by us gratuitously and are believed to be reliable, but are in no way guaranteed.

**FOR IMPORTED FIRE ANT**

**How Much To Use:** For mound treatment use 1 ounce (3 level tablespoonfuls) per mound. For broadcast treatment use 12½ pounds per acre.

**How To Use:** For mound treatment scatter evenly around base of each mound. For broadcast treatment scatter evenly over the infested area.

**When To Use:** Apply when ants are active (usually April through October). Treat new mounds as soon as they appear.

**How Long For Control:** During hot weather ants will usually die within 1 to 2 weeks. In cooler weather 2 to 4 weeks are needed.

**Retreatment:** If retreatment is needed after 3 months, treat active mounds again. Colonies may leave old mound after treatment and form new mounds but usually die after moving.

**IMPORTANT**

Equipment used must be thoroughly cleaned before applying Fire Ant Bait. Contamination with other pesticides or fertilizers may render this material ineffective.

**NOTE:** Do not make more than 3 applications at less than 3-month intervals in any twelve-month period. Do not use other insecticides on the area while the bait is being used; they may interfere with the effectiveness of the bait.

**CAUTION!**

Harmful if swallowed.

Avoid skin contact.

Wash with soap and water after using and before eating or smoking.

Do not contaminate feed or foodstuffs.

Keep out of reach of children and domestic animals.

Wear rubber gloves when handling.

Keep Container Tightly Closed And Store In A Cool Dry Place Away From Other Pesticides.

**DO NOT REUSE THIS CONTAINER**

Seller makes no warranty, express or implied, concerning results obtained by the use of this material. Buyer assumes all risks of use or handling whether or not in accordance with any suggestions, recommendations or directions of seller.
