NET WEIGHT 5 POUNDS

Fire Ant Bait

"150"

For Control of the imported fire ant

CODE 9471  
USDA Reg. No. 218-516

ACTIVE INGREDIENT:
Dodecachlorooctahydro-1,3,4-methano-2H-cyclobuta[di]pentalene* .................. 0.150%

INERT INGREDIENTS .................................................................................. 99.850%

* MIREX  
U.S. Pat. Reissue 24,750

IMPORTANT
Equipment used must be thoroughly cleaned before applying Fire Ant Bait. Contamination with other pesticides or fertilizers may render this material ineffective.

NOTE: Do not make more than 3 applications at less than 3-month intervals in any twelve-month period. Do not use other insecticides on the area while the bait is being used; they may interfere with the effectiveness of the bait.

OTHER ANTS
When applied as directed for imported Fire Ants, this product will kill the following ants that may contest the bait: Argentine Ant, Tropical Fire Ant, Southern Fire Ant, Big-Headed Ants (Pheidole sp.), Western Harvester Ant, Pavement Ant, Pyramid Ant, Pharaoh Ant and Little Black Ant.

CAUTION

Handle with care. 

Keep out of reach of children.

For Additional Caution Information See Back Panel

MADE IN U.S.A.

PRINTED IN U.S.A.

DIRECTIONS

FOR IMPORTED FIRE ANT

New Mound To Be Used: For mound treatment use 1/4 ounce (1 1/4 level tablespoons) per mound. For broadcast treatment use 5 pounds per acre.

New Mound Use: For mound treatment scatter evenly around base of each mound. For broadcast treatment scatter evenly over the infested area.

When To Use: Apply when ants are active (usually April through October). Treat new mounds as soon as they appear.

How Long For Control: During hot weather ants will usually die within 1 to 2 weeks. In cooler weather 2 to 4 weeks are needed.

Retreatments: If retreatment is needed after 3 months, treat active mounds again. Colonies may leave old mound after treatment and form new mounds but usually die after moving.

IMPORTANT

When applied as directed for imported Fire Ants, this product will kill the following ants that may contest the bait: Argentine Ant, Tropical Fire Ant, Southern Fire Ant, Big-Headed Ants (Pheidole sp.), Western Harvester Ant, Pavement Ant, Pyramid Ant, Pharaoh Ant and Little Black Ant.

CAUTION

Handle with care. 

Keep out of reach of children.
