WARNING

HARMFUL IF SWALLOWED

Keep out of reach of children
This product will severely irritate skin and eyes
Avoid transfer to food or beverage containers.
Avoid spillage on clothing as deterioration and discoloration may occur
Keep container tightly capped in an upright position. Store in a cool place
Rinse empty container thoroughly with water and discard

WARNING

Do not mix with any other chemicals
Violent chemical reactions may occur.
Add directly to pool water as per instructions
Do not mix in pool of water at poolside or in tub

WARNING: Keep out of reach of children. Harmful if swallowed. Strong oxidant. May produce chemical burns. Do not get on skin or in eyes. Do not use ammonia or other bowl cleaners with this product. To do so will release hazardous gases

FIRST AID: In case of skin and eye contact, flush with plenty of water. If skin irritation persists, get prompt medical attention. For eyes, get immediate medical attention.

INTERNAL USE: Give milk, water, or egg whites. Call a doctor immediately

DIRECTIONS

Adjust and maintain pH of pool water at 7.2 to 7.6 as determined by a test kit

For newly filled pool use at the rate of 2 quarts per 20,000 gallons to impart 1.0 ppm of available chlorine to the pool water. Repeat dosage, if necessary, until a chlorine residual of 1.0-1.5 ppm is obtained as determined by a test kit. Thereafter use at the rate of 1 quart per 20,000 gallons of pool water daily or as needed to maintain 1.0 to 1.5 ppm as determined by use of a proper test kit. Add directly to pool water near inlet to aid dispersion.

This product degrades with age. Use a test kit and increase dosage as necessary to obtain required level of available chlorine.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes.
