ACTIVE INGREDIENT:

Diazinon	
O, O-diethyl-O (2 isopropyl 6 methyl-4 pyrimidinyl)	BY WEIGHT
phosphorothioate	20%
INERT INGREDIENTS	80%
TOTAL	100%

NET WT., 15 GRAMS PER TAG

CONTENTS: 2 POUCHES OF 10 TAGS EACH

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS WARNING

Harmful if absorbed through the skin or if swallowed. Avoid contact with skin and eyes. Wash thoroughly with soap and water after handling and before eating or smoking. Avoid contamination of feed and foodstuffs. If rubbed in eyes, flush with plenty of water. If swallowed or if eye irritation persists, call a physician. Wear clean gloves daily when applying tags. Prolonged or frequently repeated skin contact may cause allergic reaction to some individuals. If sensitization reaction results, consult with a physician.

NOTE TO PHYSICIAN:

Diazinon is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

YTEX Optimizer

INSECTICIDE CATTLE EAR TAGS

- Two tags per animal give up to five month's control of pyrethroid resistant horn flies
- Two tags per animal give season long control of Gulf Coast ticks, spinose ear ticks, and substantial reductions of face flies
- Guaranteed against loss due to tag or button failure*
- Guaranteed against breakage for up to five months*
- No withdrawal time required
- Easier, faster, exclusive straight line application

Special collar for guaranteed retention*
U.S. Patent No. 4,581,834

Ribbed design for season long durability

Long taper and rounded edges for durability

GUARANTEE

This guarantee is a limited guarantee, limited to the replacement of tags only. If the tags failed after being properly applied, the owner in the animal's ear for a five (5) month period due to tag breakage or separation from button.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. The labeling must be in the possession of the user at the time of pesticide application. For optimum pest control, use two ear tags per animal, one in each ear, in May to June, when flies become a problem in the spring. Provides up to five months control of horn flies, including pyrethroid resistant horn flies. Also controls Gulf Coast ticks, spinose ear ticks, and aids in the control of face flies. Replace as necessary. Apply as shown with the YTEX two piece tagging system. Calves less than 3 months of age should not be tagged as ear damage may result.

STEP 1

Seat male button firmly on pin, press down and give a slight twist

STEP 2 Place female tag firmly under clip. Collar on tag must be pointing away from pin

STEP 3

Position applicator over ear and squeeze the handles together

The ideal position for the stud is between the second and third radial cartilage as shown

STORAGE AND DISPOSAL

Store in a cool place in original container

Opened pouches containing ear tags should be resealed for storage

Do not contaminate water, food or feed by storage or disposal

STORAGE: Store in cool place away from direct sunlight

PESTICIDE DISPOSAL: Remove tags before slaughter

Securely wrap used tags in a plastic bag or several layers of newspaper and dispose of them

CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash
