HAZARDS TO HUMANS & DOMESTIC ANIMALS:
DANGER

(This section contains small, illegible text, likely safety instructions for handling the product.)

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

1. Remove rubber band from cartridge bottle neck and make sure bottle is secured to the MR. ROOT-EATER Dispenser.
2. Remove existing cleanout plug from your sewer line and replace with the MR. ROOT-EATER dispenser. Tighten MR. ROOT-EATER's patented graduated thread dispenser into the three-inch cleanout cleanout size.
3. Connect a garden hose to the hose coupling indicated on top of the product. Turn the water on to generate flow. MR. ROOT-EATER automatically meters the amount of water necessary. One complete application requires only about twenty gallons.
4. Treatment is complete when all Copper Sulfate crystals have been dissolved (approximately thirty minutes). Disconnect hose and remove MR. ROOT-EATER from the cleanout. Re-plug the cleanout.

FOR BEST RESULTS — MAKE APPLICATION AT NIGHT OR WHENEVER SEWER SYSTEM IS LEAST ACTIVE. MR. ROOT-EATER IS NOT INTENDED TO OPEN A CLOGGED SEWER. IT IS AN EFFECTIVE PREVENTIVE MAINTENANCE SYSTEM. RE APPLICATION IS RECOMMENDED EVERY 3 MONTHS. ADDITIONAL PRE MEASURED COPPER SULFATE REFILL CARTRIDGES ARE SOLD SEPARATELY AND ARE AVAILABLE AT YOUR DEALER.
