

VERTAC

Weng-Rap® Low Volatile 68 is used to control broad leaved weeds, such as ragwort, corn bursaphum, and other weeds in the range 3 to 10 cm high. It is applied as a spray to the foliage of the weeds.

Wood-Boyd, Low Volatile 60 will kill or control the following: a. we

DIRECTIONS FOR USE

Add the recommended amount of product to about one-half gallon of water to be used in spraying. Mix well and spray on the surface until solution is visible. Agitate the surface with a brush or emulsifier.

Best results are obtained when applications are made with the brush as we report.

On Fall-Planted Wheat, Oats and Barley Use 10 to 15 lbs. per acre of 2,4-D or 2,4-D plus 2,4-DB to control weeds and grasses.

On Spring-Planted Wheat, Oats and Barley at _____
stage except _____

88 HOF forage or grain treated grain fields with a 2 week rest period with 240-300 lbs/acre application.

On Corn and Sorghum: Use 1 pint of product + 5 cups of water to cover the area where weeds are growing. Spray every 2 weeks or as needed after weeds appear. Apply to corn and sorghum. Do not apply to soybeans, alfalfa, or other legumes.

For pre-emergence use: Use 1 to 2 pints of prod.
per acre of water in the field. Apply in the
soil or to the surface.

On Turf Depending on type of weed and stage of growth. Use
1/2 lb. per 1000 sq. ft. for weeds up to 10" high. For weeds
over 10" high use 1 lb. per 1000 sq. ft. For weeds over 20" high
use 1 1/2 lb. per 1000 sq. ft. For weeds over 30" high use 2 lb.
per 1000 sq. ft. For weeds over 40" high use 2 1/2 lb. per 1000 sq. ft.

On Bangladesh Fisheries and for women Wood Control Use in an

DO NOT apply to grad on 2-1-8 but on 2-1-8

DO NOT apply to new or second areas or after flooding etc.

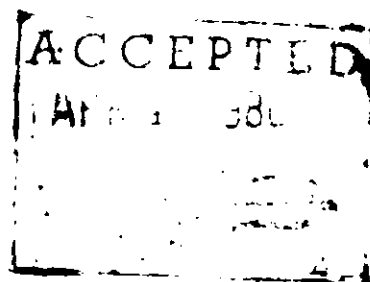

DO NOT WRITE IN THESE SPACES

For Aquatic Weeds: in lakes, ponds, drainage ditches and on the
125 1/3 parts of water to 1 part of herbicide. Use 1/2 gallon of
herbicide. Applications should be made with care to avoid
water level fluctuations and other factors.

DO NOT apply to more than 10% of the land covered by a water body.

Personnel and Other hard to control factors may be a factor in the
inadequate supply.
