

NJ-C 213

ACTIVE INGREDIENT

Poly[oxyethylene (dimethyliminio)ethylene-
methyliminio]ethylenedichloride 15.0%

INERT INGREDIENT 85.0%

This product contains 1.29 lb. of active ingredient per gallon and weighs 8.58 lb. per gallon.

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

FIRST AID: If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds or public water. For guidance, contact the regional office of the Environmental Protection Agency.

FUNGICIDE AND RODENTICIDE ACT
704 LOCATED BY THE DIVISION OF
REGISTRATION OF THE
EPA

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

Federal law to use this product in a manner consistent with its labeling.
NJ-C 213 is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, the tower must be cleaned to remove algal growth, microbiological slime, and deposits.

An initial slug addition of 4.0 to 10.0 fluid ounces of NJ-C 213 per 1000 gallons of water to provide a concentration of 32 to 80 parts per million of NJ-C 213, based on the total weight of water in the system, is recommended. Repeat initial dosage until control is evident.

Subsequent slug additions of 1.0 to 10.0 fluid ounces of NJ-C 213 per 1000 gallons of water (8 to 80 parts per million of NJ-C 213) should be employed every 2 to 5 days or as needed. The frequency of addition should be based upon the relative amount of bleedoff and the severity of the microbial problem. Slug additions should be made in the sump of water cooling towers.

STORAGE & DISPOSAL: Keep container closed when not in use. Do not contaminate water, food, or feed by storage, disposal, or cleaning equipment. The container must be triple rinsed (or equivalent) and labeled for recycling, reconditioning, or disposal in an approved landfilled or buried in a safe place. Rinse that cannot be used or recycled should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Open dumping is prohibited.
