DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk, or gelatin solution or, if these are not available, drink large quantities of water. Do not give vinegar or other acids. Do not induce vomiting. Get prompt medical attention.

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start-up, superchlorinate with one (1) pint (16 flu. ozs.) of Pool Aid sodium hypochlorite solution for each 2500 gallons of water. This dosage is equivalent to 1 ppm available chlorine by weight.

FOR POOL MAINTENANCE

- A) Adjust pool water pH to 7.6-7.2 range and maintain.
- B) Add manually or by a feeder device. Pool aid sodium hypochlorite solution at a rate to maintain an available chlorine residue 0.6 to 1.0 ppm. One half pint (8 flu. ozs.) of Pool Aid sodium hypochlorite solution for each 6000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.6 to 1.0 ppm available chlorine will depend on temperature and number of swimmers. Use test kit to measure chlorine and chlorine residue are in the proper range.

NOTE: This product degrades with age. Use a chlorine test kit to increase dosage as necessary to obtain the required level of available chlorine.

STORAGE AND DISPOSAL

Store in a cool, dry place away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved land fill. Product or residue that cannot be used should be diluted with water and disposed of in a sanitary manner. Do not allow material to be fed or fed by direct disposal or incineration.
