AVENGER can be used for long-lasting pest control in and around homes and their immediate surroundings.

This product is intended for applications with a hand duster or from the shaker can to hiding and runway areas and other places where insects are found.

**INDOOR USE:** In living areas, make applications in such a manner as to avoid deposits on exposed surfaces or introducing the material into the air.

To apply insecticide directly into cracks and crevices, use a bulbous duster or other suitable equipment. Apply lightly and uniformly to infested areas. Pay particular attention to cracks and crevices; service ducts; base floors and ceilings; wall voids; around electrical and telephone fittings

and equipment; around water and sewer pipes; under and behind cabinets, refrigerators and sinks; around windows and door frames; along baseboards; in attics and crawl spaces. The amount to be applied will vary with the site but should usually be in the range of 8 oz. per 1000 square feet.
