Gala 515 Algaecide is used to control algae and fungi in recirculating commercial and industrial water systems. Upon its use, systems must be cleaned to remove slime, and other deposits. An initial slug addition of 1.0 fluid ounces of Gala 515 Algaecide

per 1000 gallons of water to provide a concentration of 32 ppm of Gala 515 Algaecide, based on the active ingredient, in the system, is recommended. Repeat initial slug additions of 1.0 fluid ounces of Gala 515 Algaecide per 1000

gallons of water should be employed every 2 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the bacterial problem. Slug additions should be made in the summer months.
