O-C SAN-Q No.3 will control algae and bacteria slimes found in recirculating cooling tower waters.

C-C SAN-Q No.3 helps clean and loosen slime debris from cooling system surfaces. When used in slug doses, no other microbiocide is required.

O-C SAN-Q No.3 is economical to use because it is concentrated. It should be handled with care.

Precautionary Statements

Hazards to Humans

DANGER

Keep Out of Reach of Children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

STORAGE AND DISPOSAL

Storage: Keep container closed when not in use. Do not store below 40°F or above 140°F for extended periods. Store away from strong oxidizers.

Disposal: Do not contaminate water, food, or feed by storage or disposal. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Treatment effluent should not be discharged where it will drain into lakes, streams, ponds, or public water.

Do not reuse empty container. Triple rinse. May offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration.

KEEP OUT OF REACH OF CHILDREN

DANGER

Statement of Practical Treatment

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution; or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

Directions for use

GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

To control algae and bacterial slimes, use O-C SAN-Q No.3 as directed. For best results, slug feed. The frequency of addition of microbiocide needed depends on many factors. To optimize your use of O-C SAN-Q No.3 follow this procedure.

1. Initially use 6 fluid ounces per 1000 gallons of water to be treated (20 ppm active quaternary.)

Should the above dosage not give satisfactory results, use 9 fluid ounces per 1000 gallons of water.

Repeat the initial dose every seven days or increase the frequency if needed.

2. When the above treatment level is successful, use 2 to 3 fluid ounces per 1000 gallons of water to maximize efficiency. Repeat weekly as needed.

Should slime develop again, go back to initial dosage.

Cooling tower waters that are inherently low in algae growth and bacteria count may be adequately controlled by the lower range of these dosages; slug fed every seven days.

Dilute the appropriate amount of O-C SAN-Q No.3 in 1 or 2 gallons of water then add to the sump of the tower. Note, this product weighs 7.49 lbs per gallon (at 20° C).

Should tower be heavily fouled, a pre-cleaning is required.
