

U.S. ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (77-567) WASHINGTON, D.C. 20460	EPA REGISTRATION NO. 40457-8	DATE OF ISSUANCE July 22, 1985
	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT O-C F-130	

NOTICE OF PESTICIDE: REGISTRATION REREGISTRATION
 (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Omni-Chem Company, Inc.
 P. O. Box 335
 Concord, CA. 94522

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

- This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:
1. Submit and/or cite all data required for registration/re-registration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
 2. Add the phrase "EPA Registration No. 40457-8 to your label before you release the product for shipment.
 3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.
- If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.
- A stamped copy of the label is enclosed for your records.

Directions for Use
GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

O-C F-130 is used to generate chlorine dioxide through Omni-Chem's DiChlor generation system. Chlorine dioxide is useful as a sanitizer, slimeicide, fungicide, and deodorizer in institutions, industries and food processing plants.

FOOD PROCESSING PLANTS: O-C F-130 is used to control mold, slime, and algae in food processing waters such as rough washing of fruits and vegetables and flume waters. O-C F-130 is also used to control hydrogen sulfide gases and oxidation of organic matter.

INSTITUTION AND INDUSTRIAL EFFLUENT: O-C F-130 is used to control the odor generated from organic matter such as hydrogen sulfide and other sulfurous compounds.

CLOSED LOOP COOLING TOWERS in institutions, industries, and food processing plants can be maintained in sanitized condition by using O-C F-130 at a level to generate residual amount of chlorine dioxide in the water.

One gallon of O-C F-130 will produce 236,400 ppm of chlorine dioxide when mixed with hypochlorous acid or any mineral acid in Omni-Chem's DiChlor generation systems. Residual levels of chlorine dioxide range from 0.25 ppm to no more than 5.0 ppm in food processing waters with a potable water rinse necessary.

Omni-Chem technical representatives will be available to assist in determining proper usage concentrations.
