<p>NAME AND ADDRESS OF REGISTRANT (Include ZIP code)</p> <p align="center"> <input type="checkbox"/> <input type="checkbox"/> ALCO PRODUCTS, Inc. 13120 Saticoy Street North Hollywood, CA 91605 <input type="checkbox"/> <input type="checkbox"/> </p>		
<p>NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.</p>		
<p>On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.</p>		
<p>A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.</p> <p>Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.</p>		
<p>This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:</p>		
<p>1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(a)(5) when the Agency requires all registrants of similar products to submit such data.</p>		
<p>2. Make the labeling changes listed below before you release the product for shipment:</p>		
<p>a. Add the phrase "EPA Registration No. 40459-5."</p>		
<p>b. Change your environmental hazards statement to read as follows:</p>		
<p>ENVIRONMENTAL HAZARD: This pesticide is toxic to fish. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and approved in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For complete contact your state water court or Regional Office of the EPA.</p>		
<p><input checked="" type="checkbox"/> ATTACHMENT IS APPLICABLE</p> <p>SIGNATURE OF APPROVING OFFICIAL</p> <p align="right"><i>[Handwritten Signature]</i></p>		<p>DATE</p>

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Formula 914

ACTIVE INGREDIENT:

Potassium dimethyldithiocarbamate 10.0 %

INERT INGREDIENTS 90.0 %

This product contains 0.87 lb. of active ingredient per gallon and weighs 8.68 lb. per gallon.

**KEEP OUT OF REACH OF CHILDREN
WARNING**

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

WARNING: Causes eye damage and skin irritation. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Avoid contamination of food. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly after handling.

STATEMENT OF PRACTICAL TREATMENT: In case of skin contact, wash with plenty of soap and water. Remove contaminated clothing and wash before reuse. If product gets in the eyes, flush immediately with copious amounts of clean, cool water for at least 15 minutes. Get medical attention immediately. If product is swallowed, call a physician immediately. If patient is conscious, induce vomiting by stroking or tickling the patient's throat or far back on patient's tongue. Emetics such as 2 teaspoonful (10 mL) of ipecac syrup or 1 teaspoonful (5 mL) of dry mustard in warm water to form a paste or even soap in warm water can be used. Repeat until vomit fluid is clear. Then have patient drink plenty of milk, gelatin solution, beaten egg whites, sour and water, or other nonoily demulcent. Never induce vomiting or give anything by mouth to an unconscious person.

Note to physician: Probable mucosal damage may contraindicate gastric lavage.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge treated effluent into lakes, streams, ponds, or public waters unless in accordance with a NPDES permit. For guidance, contact your Regional Office of the Environmental Protection Agency.

**DIRECTIONS FOR
GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Formula 914 is used

recirculating cooling tower systems and industrial microbiological slime. Prior to the use of Formula 914 industrial and/or commercial recirculating cooling towers should be cleaned to remove algal growth, microbiological slime, and other deposits. Initial slug addition of 12.0 to 17.9 fl. oz. of Formula 914 per 1000 gal. of water to provide 100 to 150 ppm Formula 914, based on total weight of water in the system, until control is evident. Make subsequent slug additions of Formula 914 per 1000 gal. of water (ppm Formula 914) every 2 to 5 days. The frequency of addition depends upon the relative amount of microbiological problem. Slug additions should be made to the circulating tower systems.

Formula 914 is used on cooling towers which maintain effective mist-eliminating components. Prior to the use of Formula 914 cooling towers should be cleaned to remove bacterial slime and other deposits. Initial slug addition of 35.9 fl. oz. of Formula 914 per 1000 gal. of water is recommended. Repeat initial dosage until control is evident. Make subsequent slug additions of 21.0 to 35.9 fl. oz. of Formula 914 per 1000 gal. of water every 1 to 5 days. The frequency of addition depends upon the relative amount of bleedoff and the amount of water in the system. Slug additions may be made to the sump or the water in the system.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Do not expose to extreme temperatures. Do not stack more than 10 drums should be placed in overpack drums for disposal. Spills should be cleaned up and disposed of in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal is a violation of Federal Law. If these wastes cannot be disposed of by other means, contact your State Pesticide or Environmental Control Agency, or the nearest Regional Office for guidance.

CONTAINER DISPOSAL:

1. **PLASTIC:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, by incineration, or, if allowed by state and local authorities, by other procedures approved by state and local authorities.

2. **METAL:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, by incineration, or, if allowed by state and local authorities, by other procedures approved by state and local authorities.

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Formula 914 is used in recirculating cooling tower systems and industrial air conditioning systems to control microbiological slime. Prior to the use of Formula 914, industrial and/or commercial recirculating cooling towers should be thoroughly cleaned to remove algal growth, microbiological slime, and other deposits. An initial slug addition of 12.0 to 17.9 fl. oz. of Formula 914 per 1000 gal. of water to provide 100 to 150 ppm, based on total weight of water in the system, until control is evident. Make subsequent slug addition of Formula 914 per 1000 gal. of water Formula 914 every 2 to 5 days. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the bleedoff line of recirculating cooling tower systems.

Formula 914 is used in industrial and commercial recirculating cooling tower systems which maintain effective mist eliminating components. Prior to the use of Formula 914, these systems should be cleaned to remove bacterial slime and other deposits. An initial slug addition of 35.9 fl. oz. of Formula 914 per 1000 gal. of water is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 21.0 to 35.9 fl. oz. of Formula 914 per 1000 gallons of water should be employed every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions may be made to the sump or the water treatment system.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Do not expose to extreme temperatures. Do not stack more than 10 drums. Drums should be placed in overpack drums for disposal. Spills should be absorbed and disposed of in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of pesticide wastes is a violation of Federal Law. If these wastes cannot be disposed of by other means, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Regional Office for guidance.
