APPLICATION EQUIPMENT Apply NORTRON® Granules by the so-fusing standard granular application equipment. Equipment should be carefully calibrated and checked frequently during application to see that it is fusing properly. Apply uniformly the recommended rate. When applying NORTRON Granules in a band, be sure to make certain that the band width is adequate for the dosage rate being applied.

Sugar beets grown under furrow irrigation. Apply NORTRON Granule to the soil surface before planting and incorporate into the soil. Where beets are grown in beds, apply NORTRON Granule before planting and incorporate. Since NORTRON Granule must have moisture to control weeds effectively, beets should be watered and the beds are thoroughly wetted.

Sugar beets grown under sprinkler irrigation have
HORTON Grand Green emergence at time of planting,
after planting and irrigate through the soil and
emergence April 23, 1963.
