SANI-POOL

For use in controlling the growth of algae, bacteria, and fungi in swimming pools, spas, whirlpools, and hot tubs.

ACTIVE INGREDIENT:
 Poly[oxyethylene (dimethyliminio) ethylene-(dimethyliminio) ethylene dichloride] 12.0%
INERT INGREDIENT 88.0%
 This product contains 1.02 lb. of active ingredient per gallon and weighs 8.53 lb. per gallon.

KEEP OUT OF REACH OF CHILDREN
CAUTION

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.
FIRST AID: If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.
ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public water. For guidance, contact the regional office of the Environmental Protection Agency.

EPA REG. NO. 40602-7
DIRECTIONS FOR USE
GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SANI-POOL is used to control the growth of algae in swimming pools, outdoor spas, whirlpools, and hot tubs. For maximum effectiveness pools, spas, whirlpools, and hot tubs containing heavy growth of algae should be cleaned prior to using SANI-POOL.

For pools having just visible algae growth add an initial dose of 7 1/2 to 10 1/2 fluid ounces of SANI-POOL per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and tiled pool add initially 3 1/2 to 7 fluid ounces of SANI-POOL per 10,000 gallons of water. Subsequent additions of 1 1/2 to 2 1/2 fluid ounces of POOL-PURE per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools, or hot tubs having just visible algae growth require an initial dose of 7 to 11 fluid ounces of SANI-POOL per 1,000 gallons of water. For treatment of a freshly cleaned and tiled spa, whirlpool, or hot tub, add initially 4 to 7 fluid ounces of SANI-POOL per 1,000 gallons of water. Subsequent additions of 2 to 3 fluid ounces of SANI-POOL should be made every 5 to 7 days after initial treatment for maintenance.

SANI-POOL is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH's. SANI-POOL can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix SANI-POOL with concentrated dry or liquid chlorine products.

STORAGE & DISPOSAL: Keep container closed when not in use. Do not contaminate water, food, or feed by storage, disposal or cleaning of equipment. Rinse that cannot be used or reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Open dumping is prohibited.

PLASTIC CONTAINERS: Do not reuse empty container. Triple rinse and recycle or dispose of in an approved land fill or bury in safe place.
