Subject: Irgaguard B6000-Renewal of Time-Limited Indirect Food-Contact Uses
EPA Reg. No. 40810-27
Amendment Letter Dated April 4, 2013

The amendment referred to above, submitted in connection with registration under section 3(C) (7) (A) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, to add new label uses for applications involving indirect food, human drinking water and HVAC contact, is acceptable used a time-limited restriction with the following conditions.

1. The primary basis for granting a time-limited approval at this time is that the product has FDA indirect food contact approval under FDA Notification #248. The product must be first incorporated into food contact approved FDA polymers, and can be added up to a maximum of 3% by weight into the various products. The FDA approval is recorded at www.cfsan.fda.gov/. Note that the FDA approval is for a zinc concentration range from 19-23% in the formula, which is slightly higher than the declared nominal concentration of this product at 17.90%.
2. The following outstanding generic data for both silver and zinc must be submitted (i.e., four studies total, two per active ingredient) and found acceptable by 6/1/15. You are responsible for using the correct Technical Grade Active Ingredient test substance to satisfy these data.

870.3150 Subchronic oral toxicity (90 day feeding; non-rodent)
870.3800 Two generation reproduction and fertility effects, rat

The rest of the tier-one generic data set required to support these new uses is listed on the submitted data matrix. The Agency has the following comments on this matrix:

On page 4/9, the listed 90 day oral toxicity study, subchronic non-rodent study, and reproduction study for silver are listed as being submitted by "Ciba" and "own". These designations are incorrect and must be revised to reflect the data gaps for the two silver studies required above, and that only one 90 day rodent study is required.

On page 2/9 and 3/9, delete the 24 listings for "Product Specific Data for Source Product" which are not needed. You must submit a signed and data revised data matrix which reflects these changes with your final printed labels.

- 3. All the indirect food/drinking water, and HVAC uses listed on the proposed draft label have a time limited approval which automatically expires on 6/1/15. If the outstanding data listed above is fully satisfied by 6/1/15, and an aggregate risk assessment is found acceptable for all uses, the time-limited restriction will be lifted. If the data is not satisfied, and/or if the risk assessment is not found acceptable, the Agency will require you to delete all or certain affected uses.

You must submit/cite all data required for registration and/or reregistration of your product under FIFRA section 3(c)(5) and section 4 when the Agency requires all registrants of similar products to submit such data. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

All subsequent amendments that are approved for this product will also be time-limited to expire on 6/1/15.

A stamped copy of the approved time-limited label is enclosed for your records.

If you have any questions about the comments in this letter, please contact Karen M. Leavy at (703)-308-6327.

Sincerely,

Marshall Swindell
Product Manager 33
Regulatory Management Branch I

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not use this product for any human drinking water contact uses in the United States. Only for manufacture of or fabrication into antimicrobial pesticides for 1) the uses listed on this label and technical bulletin; 2) Uses for which USEPA has approved the required data and/or citations of data that the formulator has submitted in support of registration; and 3) Uses for experimental purposes that are in compliance with USEPA requirements. Irgaguard® B6000 is an antimicrobial powder for the manufacture of polymeric, plastic, and latex products only. It is designed to be used in materials that may be incorporated into the products on the technical bulletin for Irgaguard® B6000 during the manufacturing process to impart antimicrobial activity to the manufactured products. Irgaguard® B6000 suppresses the growth of bacteria, algae, fungus, mold and mildew which cause unpleasant odors, discoloration, staining, deterioration or corrosion of those manufactured products. Finished products containing Irgaguard® B6000 may not make public health claims relating to antimicrobial activity without EPA pesticide registration. When incorporated into treated articles, this product does not protect users of any such bacteria, viruses, germs or other disease causing organisms. Irgaguard® B6000 may be incorporated into materials that may be used in the finished product at 0.1 to 3.0% of Irgaguard® B6000 by weight. For use in Adhesives and Sealants, may be incorporated into the finished product at 0.1 to 5.0% by weight. Contact BASF Corporation to determine the appropriate amount of Irgaguard® B6000 for individual finished products.

PRECAUTIONARY STATEMENTS KEEP OUT OF REACH OF CHILDREN CAUTION

HAZARDS TO HUMANS

CAUTION. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

FIRST AID:

- Have the product container or label with you when calling a poison control center or doctor, or going for treatment.**
- IF IN EYES:**
 - Hold eye open and rinse slowly and gently with water for 15 - 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
 - Call a poison control center or doctor for treatment advice.

STORAGE AND DISPOSAL

Nonrefillable container. Do not reuse or refill this container. Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Do not store in areas accessible to children. Keep away from direct sunlight.

Pesticide Disposal: Wastes from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Completely empty bags into processing equipment where the pesticide is used. Offer for recycling, if available. Otherwise dispose of empty bag and box in sanitary landfill or by incineration, if allowed by state and local authorities.

Note: Amendment dated Apr 03, 2013 to renew time-limited uses; Irgaguard B6000 Label (01/2011) and Technical Bulletin (01/2011).

Irgaguard® B6000

EPA Reg. No. 40810-27

Material preservative and antimicrobial agent for use in the manufacture of polymer, plastic, and textile products

For Manufacturing/Fabrication Use Only

IRGAGUARD® B6000 is an antimicrobial pesticide for the manufacture of polymeric, plastic, and latex products only. It is designed to be incorporated into the materials for manufacture into final products listed below during the manufacturing process to impart antimicrobial activity to the manufactured products. IRGAGUARD® B6000 suppresses the growth of bacteria, algae, fungus, mold and mildew which cause unpleasant odors, discoloration, staining, deterioration or corrosion of those manufactured products.

Finished products containing IRGAGUARD® B6000 may not make public health claims relating to antimicrobial activity without EPA pesticide registration. When incorporated into treated articles, this product does not protect users of any such treated article or others against foodborne or disease causing bacteria, viruses, germs or other disease causing organisms.

IRGAGUARD® B6000 may be used in material that may be incorporated into the finished product at 0.1 to 3.0% of IRGAGUARD® B6000 by weight. For use in Adhesives and Sealants, may be incorporated into the finished product at 0.1 to 5.0% by weight. Contact BASF Corporation to determine the appropriate amount of IRGAGUARD® B6000 for individual finished products.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. IRGAGUARD® B6000 is intended for use as an additive into the following materials and substances as part of the manufacturing process in order to provide built-in antimicrobial activity in manufactured and finished products.

FOOD CONTACT USES: APPLICATIONS AND TYPES OF MATERIALS

Irgaguard B6000 may be used as an antimicrobial additive in the polymeric manufactured products listed below that are used for manufacturing, packing, packaging, transporting, handling and/or holding food if such use is not intended to have any microbial effect in the food itself. Do not incorporate Irgaguard B6000 into any food or drinking water contact application listed on this label without first incorporating Irgaguard B6000 into a polymer which is approved with associated use conditions for food contact in 21 CFR 174-186 (inclusive) as amended or in the United States Food and Drug Administration's Food Contact Substance Notification System, as amended.
