SENTRICIDE 100

ACTIVE INGREDIENT
Poly (oxyethylene (dimethyliminio) ethylene-
(dimethyliminio) ethylene dichloride) 10.0
INERT INGREDIENT 90.0

This product contains 0.85 lb of active ingredient per gallon and weighs 8.49 lb. per gallon

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.
FIRST AID: If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.
ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required to discharge containing this pesticide into lakes, streams, ponds, or other water. For guidance, contact the regional office of the Environmental Protection Agency.

DIRECTIONS FOR USE
GENERAL CLASSIFICATION

This product is to be used in a manner inconsistent with the labeling.

SENTRICIDE 100 is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to remove algal growth, microbiological slime and other deposits.
An initial slug addition of 6.13 to 15.32 fluid ounces of **SENTRICIDE 100** per 1000 gallons of water provide a concentration of 48 to 120 parts per million of **SENTRICIDE 100** based on the total weight of water in the system is recommended. Repeat initial dosage until control is evident.
Subsequent slug additions of 1.53 to 15.32 fluid ounces of **SENTRICIDE 100** per 1000 gallons of water (12 to 120 parts per million of **SENTRICIDE 100**) should be employed every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

STORAGE & DISPOSAL: Keep container closed when not in use. Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment. The container must be triple rinsed (or equivalent) and offered for recycling, reconditioning, or disposal in an approved landfill located in a safe place. Rinsate that cannot be used or reprocessed should be disposed of in a landfill approved for pesticides or buried safely away from water supplies. Open dumping is prohibited.
