# Microbiocide W-60

REGISTERED  
EPA REGISTRATION NO. 100-100-0100  
EPA REGISTRATION NO. 100-100-0100

## ACTIVE INGREDIENT

Polyoxetene-10  
dimethylammonium chloride

## INERT INGREDIENT

This product contains 10% active ingredient.  
90% inert ingredients.

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

PRECAUTIONARY STATEMENTS  
HAZARD TO HUMANS AND THE ENVIRONMENT

CAUTION: Harmful if swallowed. Avoid contact with skin, eyes, nose, and mouth.

FIRST AID: If swallowed, induce vomiting. If in contact with eyes, flush with water for 15 minutes. If in contact with skin, wash with soap and water.

ENVIRONMENTAL HAZARD: This product is highly toxic to aquatic organisms. Do not discharge into waterways.

USE PRECAUTIONS: Use only as directed. Do not use in residential areas. Do not use on lawns, gardens, or ornamental plants.

## Directions for Use

Microbiocide W-60 is used to control bacteria and fungi in water systems and industrial water cooling towers. Prior to use, the water should be tested for microbial growth. Microbiological testing should be done at least once a month.

For water systems, add 2 fluid ounces of MICROBIOCIDE W-60 to 100 gallons of water to provide a concentration of 8 to 20 parts per million of MICROBIOCIDE W-60 based on the total weight of water in the system. Repeat initial dosage until control is evident.

For industrial water cooling towers, add 2 fluid ounces of MICROBIOCIDE W-60 to 100 gallons of water to provide a concentration of 8 to 20 parts per million of MICROBIOCIDE W-60. It may be employed every 2 to 5 days or as often as necessary, depending on the relative amount of microbial growth in the water. Sludge additions should be made as recommended.

Microbiocide W-60 is not intended for use on humans or animals. It is not for use in drinking water. It is not for use in food or feed. It is not for use in the treatment of wastewater. It is not for use in the treatment of industrial effluents.

Microbiocide W-60 is a registered pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act. It is registered for use as a bactericide and fungicide. It is registered for use in water systems and industrial water cooling towers. It is registered for use in the treatment of wastewater and industrial effluents.
