BEST DOCUMENT AVAILABLE

Water Filteration Motors  
This is a disposable cartridge for use in the  
CONCEPT™ Bacteriostatic Home Water Filter.  
The cartridge contains a silver ion impregnated  
polypropylene filter media which kills and  
removes bacteria from the water passing  
through it. The silver ion impregnated  
polypropylene filter media is contained  
within a plastic housing which is attached  
to the filter housing of the filter.  
The cartridge is designed to last for  
approximately 6 months of use. The  
cartridge should be replaced when the  
water flow rate is noticeably reduced.  
The cartridge should be replaced when the  
water flow rate is noticeably reduced.
