ENFORCER® NEXT DAY® GRASS & WEED KILLER CONCENTRATE

A Contact, Non-Selective, Non-Systemic Vegetation Killer for the Control of Broadleaf Weeds and Grasses

This product is inactivated on contact with the soil.

Kills Most Grasses and Weeds on Contact! Makes 2.6 to 64 Gallons Re-Seed or Re-Plant in 48 Hours Rainfast in 30 Minutes Covers up to Sq. Ft.

ACCEPTED JUL 1 0 2003

Under the Federal Insecticide

ACTIVE INGREDIENT:

Diquat Dibromide

...... 2.38%

Total 100.00%

Contains 0.14 lbs. Diquat cation per gallon as 0.25 lbs. salt per gallon.

Keep Out of Reach of Children **WARNING**

See back panel for additional precautionary statements.

Net Contents: 32 Fl. Oz. (946 mL)

{Back Panel}

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Entry Restrictions: Do not allow people or pets to contact treated plants until the spray has dried.

Application Restrictions: Do not apply this product in a way that will contact any person or pet, either directly or through drift. Only persons applying this product may be in the area during application.

User Safety Recommendations:

- Wash clothing and protective equipment exposed to this product in detergent and hot water. Keep and wash such items separately from other laundry.
- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside; then thoroughly wash and put on clean clothing.

Partial Listing of Weeds

Annual Blue Grass, Chickweed, Crabgrass, Florida Pusley, Foxtail, Garden Spurge, Goosegrass, Henbit, Knotweed, Lambsquarter, Mayweed, Oxalis, Pigweed, Prickly Lettuce, Purslane, Puncture Vine, Redroot Pigweed, Sandspur, Shepards Purse, Sowthistle, Smartweed, St. Augustinegrass, Velvetweed, Wild Geranium and grasses that creep over, under or around lawn edging and that have grown-up through paved patios, walkways and driveways, such as Bahia Grass, Bermudagrass, Centipedegrass, St. Augustinegrass and Zyosiagrass.

40849-59: Page 2 of 2 03/07/03; 10:21 AM

- 1. Shake well before each use.
- 2. Choose the correct dilution rate according to the types of grasses or weeds to be controlled.
- 3. Select a method of application: sprinkler can, tank sprayer, trigger sprayer. Mix the product with water to the specified dilution rate.
- 4. Thoroughly wet the grasses or weeds to be controlled.
- 5. Undesirable weeds and grasses will begin to wilt and brown within hours.

TYPES OF WEEDS CONTROLLED	DILUTION RATE
*Above-Ground Weeds: Around buildings, walkways, patios, fence lines and driveways	½ ounce per gallon of water
Easy to Control Weeds: Such as ajuga, black medic, dandelion, moringglory, oxalis and plantain (broadleaf or lanceleaf)	3 - 5 ounces per gallon of water
Hard to Control Weeds: Such as barnyard grass, green foxtail, ground ivy, knotweed, portulace and spotted spurge	6 - 8 ounces per gallon of water
Hardest to Control Weeds: Such as crabgrass (smooth/large), goosegrass and quackgrass	9 - 12 ounces per gallon of water

Some hard-to-control weeds may require additional treatments.

General Weed Control in Non-Crop Areas: Controls broadleaf weeds, brush and grasses by top kill of perennials and annuals. Kills most types of grass and weed on contact. This product kills only through the leaves.

General Weed Control in Shrub Areas: This product will not injure desirable plants provided the spray mist does not come in contact with the leaves of these plants. The concentrate becomes inactive on contact with soil.

General Vegetation: Controls weeds around buildings and other installations, walkways, patios, storage areas, greenhouse benches, fence lines, driveways, drainage ditches and sand traps.

Non-Crop/Non-Planted Areas: To kill above-ground weed growth around buildings, walkways, patios, beneath greenhouse benches, fence lines and driveways. For control of undesirable broadleaf and grass-type weeds, use ½ ounce of concentrate per gallon of water. Apply for complete coverage and thorough weed contact. Apply preferably to young growth and up to seedling of weeds. Repeat applications may be necessary to maintain control, particularly on grasses and established weeds. Do not contact with foliage, food crops or ornamental plants. Re-seed in 48 hours. Do not water treated areas for 24-36 hours after application. Do not allow anyone on treated areas within 24 hours of application unless protective clothing is worn.

Helpful Hints:

- 1. To achieve best results, apply on a sunny day when temperature is above 60°F in early morning after dew has evaporated. Do not apply if rain is expected within 12 hours of treatment. Do not water treated areas 24-36 hours after application.
- 2. Do not spray this product on desirable plants or grasses, as injury may result. To avoid drift to desirable plants, do not apply on windy days. If contact occurs, rinse the plants with water.
- 3. Use a higher dilution rate (up to 12 ounces per gallon of water) for hard-to-kill grasses and weeds, such as Bermudagrass.
- 4. Thoroughly wash application equipment after each use.

Storage and Disposal

Storage: Store in a cool, dry (preferably locked) storage area inaccessible to children and pets. **Disposal:** If Empty: Do not reuse this container. Place in trash or offer for recycling if available. If Partly Filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

^{*}See complete instructions on side panel under Non-Crop/Non-Planted Areas.
