

U.S. ENVIRONMENTAL PROTECTION AGENCY
 Office of Pesticide Programs
 Registration Division (H7505C)
 401 "M" St., S.W.
 Washington, D.C. 20460

EPA Reg. Number:
 40849-67

Date of Issuance:
 JUL 16, 1997

Term of Issuance: Conditional

NOTICE OF PESTICIDE:
 Registration
 Reregistration

Name of Pesticide Product:
 Enforcer
 Esfenvalerate RTU
 Insect Spray

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Enforcer Products, Inc.
 5145 Forest Run Trace
 Suite B
 Alpharetta, GA 30202-4504

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Make the labeling changes listed below before you release the product for shipment:

a. Add the phrase "EPA Registration No. 40849-67".

b. On the front panel delete "Controls Numerous Pests In and around Structures". This statement is too vague. You may list specific pests.

c. We assume that the target user for this type of packaging is primarily the homeowner. Thus delete the commercial sites warehouses, theaters, hotels, motels, office buildings, kennels and related statements. "Do not treat establishments where livestock feed is present." "xxx do not exceed more than one application every 14 days" and revise the front panel statement to read: "For Use Only In and Around the Home and other residential areas."

Signature of Approving Official:

Date:

276

If it is your intent to keep commercial sites also then revise the front panel to read: "For Use in and Around the Home, Apartment Buildings, Kennels, and Non-Food/Feed areas of Warehouses, Office Buildings, Theaters, Hotels, Motels".

You would then retain the related statements above and also add the standard paragraph explaining what a non-food area is (see your initial label).

d. Under Indoor Pests Control add: "In the home all food processing surfaces, and utensils should be covered during treatment or thoroughly washed before use. Remove pets, birds and cover aquariums before spraying."

e. Will this product be individually filled when marketed or sold along with the single dose product?

f. Is this product to be reused one time only? If it is to be reused then the disposal statement must be revised.

3. Submit two (2) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Net Contents: 1 Gallon

EPA Reg. No. 40849-AT

EPA Est. 40849-GA-1

*A registered fire ant mound treatment should be used in conjunction with this product.

NOTE: Label for Ready to use product.

**PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals**

CAUTION: Harmful if swallowed, inhaled or absorbed through skin. Causes moderate eye irritation. Avoid breathing dust. Avoid contact with skin, eyes and clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and warm water after handling. Remove contaminated clothing and launder separately before reuse.

Statement of Practical Treatment

If Swallowed: Call a physician or poison control center. Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

If Inhaled: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

If on Skin: Wash with plenty of soap and water. Get medical attention if irritation persists.

If in Eyes: Flush eyes with plenty of water. Get medical attention if irritation persists.

Environmental Hazards

This product is toxic to fish, birds and wildlife. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters.

Physical or Chemical Hazards

Do not use or store near heat or open flame. Do not use this product in or on electrical equipment due to the possibility of shock hazard.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Cut along dotted line & remove water soluble packet.

SPRAYER INSTRUCTIONS

How to prime and care for your sprayer:

1. After shaking product well, remove cap from container and replace with sprayer hose and cap assembly. Tighten securely.
2. Turn sprayer nozzle one half turn counter-clockwise. Hold sprayer below the level of container and prime by pumping trigger 10-15 times until product is dispensed. Adjust nozzle to fine spray or jet stream as needed.
3. To store, turn nozzle to "OFF" position and store with sprayer above level of liquid in container to prevent leakage.

(Alternate Step 2 for trigger type sprayer)

2. Turn sprayer nozzle until fully open. Hold sprayer.....(Remainder of Step 2 the same)

FOR INDOOR PESTS:

Apply as a coarse, wet spray to thoroughly treat hiding places, such as cracks and crevices, moist areas around pipes, under refrigerators, along baseboards or other areas where insects may frequent or hide. Spray directly on insects when possible. Do not permit humans or pets to contact treated surfaces until the spray has dried. Repeat as necessary. Do not treat establishments where livestock feed is present.

To Kill Cockroaches, Ants, Centipedes, Crickets, Millipedes, Psocids, Scorpions, Silverfish, Sowbugs, Spiders and Waterbugs: Apply this spray with a sprayer that produces coarse, wetting droplets into all cracks and crevices in woodwork, floors, underneath sinks, areas behind pipes, pieces of equipment or areas where these pests are found or may hide, including dark corners of rooms and closets; cracks and crevices in walls; along baseboards; around door and window frames; behind and beneath sinks, stoves, refrigerators, cabinets, around garbage cans, plumbing and other utility installations. Contact as many insects as possible with direct spray. Pests driven out of hiding places should be sprayed directly. For ants, apply to ant trails, around doors and windows and wherever these pests may find entrance. Repeat applications as needed, but do not exceed more than one application every 14 days.

To Kill Carpenter Ants: Apply as a coarse spray around doors, door frames, windows and other areas where ants enter premises or hide. Spray into cracks and crevices, through openings or small, newly drilled holes into wall voids where ants or their nests are present.

NOTE: Label for Ready to use product.

FOR OUTDOOR PESTS:

GENERAL: Use this product to control on contact: *cockroaches, ants, crickets, sowbugs, spiders and ticks.* Use at the rate of 1 gallon per 500 square feet to outside surfaces of buildings, porches, patios, garages and other areas where these pests are seen or found. Do not allow spray to contact ornamental plants or shrubs due to possible injury.

Building Perimeter Treatment: To help prevent infestations of buildings by *ants, boxelder bugs, centipedes, crickets, hornets, millipedes, scorpions, sowbugs (pillbugs), spiders, wasps and yellow jackets,* treat a 2-6 foot band of soil or other substrate adjacent to buildings, building foundations to a height of 2-3 feet, eaves, crawl spaces or other areas where these pests are active and may find entrance. Apply as a coarse, wet spray at the rate of 1 gallon per 500 square feet. Repeat as needed. Keep children and pets off treated areas for 24 hours or until the grass has completely dried.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry area out of reach of children. Protect from freezing.

DISPOSAL: Do not reuse container. Wrap and put in trash.
