SPOT TREATMENT

For Spot Treatment of Individual Weeds: Adjust sprayer nozzle to a coarse spray. Apply only when the air is calm to avoid spray drifting to desirable plants. Position sprayer 12 to 18 inches from weeds. Apply until thoroughly covered.

IMPORTANT: This is a non-selective weed killer and should NOT be used for spot weed control in lawns. It kills all green plants, including lawn grass. If accidental spraying occurs, immediately wash plant off with water. If spraying in or near flowers, place a piece of cardboard between the weed and flower to prevent accidental spraying. Treated areas may be replanted with ornamentals or flowers one day following treatment.

WHEN TO USE: Use anytime weeds and grasses are actively growing. Treated weeds may show initial symptoms within 6 hours and complete kill in 1 to 2 weeks. Larger, more established weeds may need an additional week for complete kill. Product works best in warm, sunny weather with daytime temperature above 55°F. For best results, apply to weeds and grasses that are actively growing. Reapply if rainfall occurs within 4 hours. **WHERE TO USE:** For **General Weed Control:** Use along fences, patios, sidewalks, driveways, around trees, shrubs, ornamental plantings, flower beds, and brick or gravel driveways. Use to trim and edge landscape areas. This is a non-selective weed killer and should NOT be used for spot weed control in lawns. It kills all green plants, including lawn grass. For **Spot Spraying:** Use on actively growing weeds in and around flower beds, ornamental trees, fruit and nut trees, grapevines, shrubs, fences, driveways and sidewalks. Spray when the air is calm to avoid accidental spray drift on desirable plants. If necessary, use cardboard or plastic to shield plants. For **Landscaping:** Use to prepare areas for planting of ornamental trees, shrubs, rock gardens or flower beds. Product may be sprayed over the root zones of desirable plants.
