Contains: 6 Child Resistant Bait Stations

Net Weight: 0.48 Oz. (0.08 Oz. per station)

*[Back Panel]*

**For Use In and Around:** Apartments and homes including but not limited to: bathrooms, kitchens, counters, corners, under and around cabinets, sinks and near plumbing fixtures.

This product is designed to kill both large and small roaches. The active ingredient, Abamectin, is an advanced formula that kills roaches 24 hours a day! This product kills roaches where they breed – behind your walls. This unique bait [station] continuously kills roaches for up to three months. It is designed to eliminate even severe roach infestations and will kill roaches that are resistant to other types of insecticides.

**Kills:** German Cockroaches, Oriental Cockroaches, American Cockroaches, Brown Banded Cockroaches and Smokey Brown Cockroaches.

**FACT:** Cockroaches are nocturnal – if you've seen one, you haven't seen them all. The few you see by day were most likely forced out by overcrowding, a possible sign of severe infestation.

**FACT:** Allergies can be aggravated by dust created by cast-off cockroach skin, dead bodies and droppings.

**FACT:** Cockroaches feel safe in cracks and crevices. Cockroaches spend as much as 75% of their lives hiding in cracks and crevices.

Enforcer's unique "Clear View" design allows for easy visible inspection.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Remove bait stations from container.
2. For thorough roach control, use all 6 baits at one time.
3. Baits work best on horizontal surfaces touching corners and walls. For example, place baits next to the wall along baseboards, in corners, under sinks, in cabinets and near plumbing fixtures.
4. Roaches will begin eating the bait immediately. You will see fewer roaches within days.
5. Replace ALL baits every three months or until the roach population is completely eliminated.

For maximum effectiveness, replace baits before they are completely consumed.

**NOTE:** DO NOT apply aerosol insect sprays or pump sprays onto the surface areas to be treated with roach bait [stations]. Insecticide sprays will repel roaches from feeding at bait station locations.

*[alternate directions]*

**KILLS:** Cockroaches (including carbamate, organophosphate, organochlorine and pyrethroid resistant strains).

Net Weight: 0.63 oz (18 grams)

Contains 12 Child Resistant Bait Stations at 0.05 oz (1.5 grams) per unit

These bait stations contain a slow acting insect bait. For best results placement of the bait should be into or near insect harborage sites.

**FOR USE IN AND AROUND:** Apartments, Campgrounds, Food Storage Areas, Homes, Hospitals, Hotels, Meat Packaging and Food Processing Plants, Motels, Nursing Homes, Resorts, Restaurants and other Food Handling Establishments. Schools, Supermarkets, Transportation Equipment (Buses, Boats, Ships, Trains, Trucks, Planes), Utilities, Warehouses, and other Commercial and Industrial Buildings.

**COCKROACHES:** Concentrate treatment at insect activity sites, and other sites where these insects are found.

1. Break bait stations apart from the plastic frame. [Alternate Directions: Remove bait station from container.]
2. For thorough roach control, use as many bait stations as necessary to achieve good coverage and control of the existing infestation for the treated area.
3. For best results, place the bait stations next to the wall along baseboards, in corners, under sinks, in cabinets and near plumbing fixtures. Use under and around equipment and appliances. If possible, place in voids.
4. Bait stations work best on horizontal surfaces touching corners and walls. Remove peel and stick backing on reverse side of bait station before applying to vertical surfaces.
5. Replace bait stations when necessary, approximately every 3 months.

**APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS:** Food handling establishments include places other than private residences in which food is held, processed, prepared or served.

**FOOD AREAS:** Includes areas for receiving, storage, packing (canning, bottling, wrapping, and boxing), preparing, and edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups). Avoid contamination of food. Use as instructed above.

**AIRCRAFT CABINS:** Place bait stations in suspected and infested cockroach areas. Place bait stations in areas between elements of construction. Use up to 12 bait stations per galley and up to 6 bait stations per rest room. In cargo holds, use 12 bait stations per 50 sq. feet. Do not use bait stations in cockpit area.

#### **STORAGE AND DISPOSAL**

**STORAGE:** Store in a cool, dry location inaccessible to children and pets.

**DISPOSAL: If Empty:** Do not reuse the bait station. Place in trash or offer for recycling if available. **If Partly Filled:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never placed unused product down any indoor or outdoor drain.

#### **PRECAUTIONARY STATEMENTS**

##### **Hazards to Humans & Domestic Animals**

**CAUTION:** Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

#### **FIRST AID**
