PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

Keep Out of Reach of Children. Corrosive. Causes severe eye irritation. Avoid contact with eyes, on skin or on clothing. Wear goggles or face shield when handling. Harmful or fatal if swallowed. Avoid contact with food.

FIRST AID

In case of contact immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. For ingestion, do not induce vomiting. If swallowed, drink plenty of water. If you are not a doctor, do not give anything by mouth to someone who has swallowed this product. If you are a doctor, please refer to the enclosed statement of ingredients.

NOTE TO PHYSICIAN

Probable cause of death may be related to the use of this product. May cause a circulatory shock as well as respiratory and renal distress. In the event of a mechanical failure, the use of this product may be related to the use of an intravenous injection of a short acting barbiturate drug.

ENVIRONMENTAL HAZARDS FISH AND WILDLIFE PRECAUTIONS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or water. Do not contaminate water by cleaning, refilling, or disposing of containers.

STORAGE AND DISPOSAL

- DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL
- OPEN DUMPING IS PROHIBITED
- DO NOT REUSE EMPTY CONTAINER

PESTICIDE DISPOSAL — For more information, contact your local health department or the nearest state or federal health department. Do not place in household waste.

CONTAINER DISPOSAL — For more information, contact your local health department or the nearest state or federal health department. Do not place in household waste.

Q-MAX

DIRECTIONS FOR USE

GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Initial Dose: Add 1 gallon Q-MAX swimming pool algaecide to 50,000 gallons of pool water.

Maintenance Dose: Add 1 quart Q-MAX swimming pool algaecide to 50,000 gallons of pool water.

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of Q-MAX for each 10,000 gallons of fresh make-up water added per week. When swimming season is over, add 1 gallon of Q-MAX to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

When Q-MAX is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium inundatum* (black algae), *Phormidium retzii* (Square D algae), *Lyngba versicolor* (blue-green) and other swimming pool algae.

Q-MAX is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other water-treating by itself directly to pool water. Q-MAX at use dilution is non-corrosive to inanimate surfaces.
