STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Do not induce vomiting. Drink large quantities of fluid and call a physician immediately.  
 If On Skin: Wash immediately with plenty of water.  
 If In Eyes: Causes severe eye irritation. Wash with plenty of water and get medical attention immediately.

SIDE PANEL

PRECAUTIONARY STATEMENTS: READ BEFORE USE.  
 HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Keep out of reach of children. Do not get in eyes, skin or clothing. Causes skin irritation. In cases of contact, wash immediately with plenty of water. For eyes, get medical attention immediately. Harmful if swallowed. Avoid contamination of food. Use goggles or face shield when using. Remove and wash contaminated clothing before reuse. Avoid alcohol.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems, without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Federal Office of the EPA.

**ACCEPTED**  
 OCT 16 1985  
 Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 41260-8

**PHYSICAL AND CHEMICAL HAZARDS:** Never mix chemicals together, but apply each separately as directed.

**STORAGE AND DISPOSAL:** Keep from freezing. Keep container closed when not in use. Do not reuse container. Thoroughly rinse empty container with water then destroy by placing in trash collection. In case of spill or leak, flush with plenty of water.

**DIRECTIONS FOR USE:** IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

**DIRECTIONS FOR USE: INITIAL DOSE:** One(1) gallon for each 37,000 gallons of water or 8 oz.( 1 cup) for each 2,200 gallons of water. Apply to freshly filled, clean pools.

**CONTINUING DOSE:** One quart for each 37,000 gallons of water every 2 days in warm, sunny or humid weather. Every 3 to 5 days in cool or cloudy weather.

**BOOSTER DOSE:** Add one(1) quart for each 37,000 gallons of water or 2 ozs. for each 2,200 gallons of water after a heavy or prolonged rainfall. Increase continuing dosage slightly or apply more frequently whenever the bathing load is unusually heavy. The pool should be properly cleaned and filled with fresh water before beginning algicide treatment. However, if it is impractical to empty the pool and growth of algae is visible, use 1 gallon for each 7,500 gallons overnight. By morning, the withered algae will have fallen down or may be brushed to the bottom and then be swept out while the level of the pool is dropped one or two feet. Then apply the initial dose of 1 gallon in 37,000 gallons of water.

**WADING POOLS:** Use larger doses in wading pools because of the smaller amounts of water per bather. Add 2 oz. of Algicide Formula "A" for each 220 gallons of fresh water as pool is being filled. Repeat with 1 oz. for each 450 gallons every four days. In hot sunny weather, repeat every two days.

Algicide Formula "A" requires no specific equipment for applications. It may be poured directly into the water from any point around the pool or through any water circulating system. At normal dosages, Algicide Formula "A" is compatible with all chemicals normally used in swimming pools. It will conserve their effectiveness.

Algicide Formula "A" is a concentrated solution of a quaternary ammonium chloride and is an effective agent to control the growth of algae in public and private swimming pools.
