

PROVEN PRODUCT
POOL-CARE

Concentrate: One gallon treats 50,000 gallons of water.

**SWIMMING
POOL**

ALGICIDE
FORMULA "B"

**KILLS
BLACK ALGAE
GREEN ALGAE**

CONCENTRATED SWIMMING POOL ALGAEICIDE

KEEPS POOL WATER CLEAR AND FREE OF VISIBLE ALGAE CONTROLS ALGAE SLIMES

ACTIVE INGREDIENTS:

n-Alkyl (60% C14, 30% C16, 6% C12, 5% C18) dimethyl benzyl ammonium chloride 84%

n-Di-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) methyl benzyl ammonium chloride 16%

INERT INGREDIENTS: 90.0%

TOTAL 100%

DANGER KEEP OUT OF REACH OF CHILDREN

41260-10

PM

For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Never mix chemicals together, but apply each separately as directed.

STORAGE AND DISPOSAL: Keep from freezing. Keep container closed when not in use. Do not reuse container. Thoroughly rinse empty container with water then destroy by placing in trash collection. In case of spill or leak, flush with plenty of water.

DIRECTIONS FOR USE: IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

DIRECTIONS FOR USE

INITIAL DOSE: One gallon Algicide to 50,000 gallons of water. One quart treats 12,500 gallons.

MAINTENANCE DOSE: One quart Algicide to 50,000 gallons of water. Eight ounces treats 12,500 gallons.

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance.

Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of Algicide for each 10,000 gallons of fresh make up water added per week.

When swimming season is over, add 1 gallon Algicide to 50,000 gallons of water in treating water left in pool. This does help provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

Swimming Pool Algicide Formula B

When Algicide is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium inundatum* (black algae), *Phormidium retzii* (Square D algae), *Lyngba versicolor* (blue-green) and other swimming pool algae.

NOTE: Kill, control and/or destroy refer to initial dose. Prevent development, suppress growth, inhibit, refer to maintenance dose.

Algicide is compatible with most commonly used swimming pool chemicals but should not be mixed with soap or other cleaners or premixed with other water-treating chemicals. Algicide works best when added by itself directly to pool water. Algicide at use dilution is non-corrosive to inanimate surfaces.
