**CAUTION**

**KEEP OUT OF REACH OF CHILDREN**

This product contains 5.75 lbs. of active ingredient per gallon and weighs 9.6 lbs. per gallon.  
Net contents per pill: 5.75 fluid ozs. (170 ml.)

**ACTIVE INGREDIENT:**  
Poly[oxyethylene (dimethyliminio) ethylene-  
(dimethyliminio) ethylene dichloride] 40%  
**INERT INGREDIENT** 60%

**ALGAECIDE**  
**AQUAPILL 5**

### CAUTION

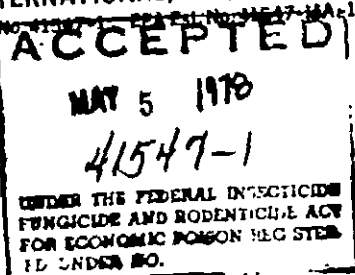

#### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes or clothing. Avoid contamination of food.

**PRACTICAL TREATMENT (FIRST AID):** If swallowed, promptly drink a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately. If on skin, flush with plenty of water for at least 15 minutes. If in eyes, flush with plenty of water for at least 15 minutes. If eye irritation persists, get medical attention.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds or public water. For guidance, contact the regional office of the Environmental Protection Agency.

### DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is in violation of federal law to use this product in a manner inconsistent with its labeling.

ALGAECIDE AQUAPILL 5 is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy algae growth should be cleaned prior to using ALGAECIDE AQUAPILL 5.

To use ALGAECIDE AQUAPILL 5 first remove the tape from the front of the AQUAPILL to uncover the tiny feed holes. Immediately place the AQUAPILL in the skimmer basket of the pool, with the pump in operation. The algaecide will be released slowly and constantly, directly into the water circulation system. The pump should be in operation for at least several hours after the AQUAPILL is put into use, and daily.

**DOSAGES:** For pools having just visible algae growth, place 2 to 3 AQUAPILLS per 10,000 gallons of water in the skimmer basket. Distribute the pills equally if the skimmer baskets number more than one. For initial treatment of freshly cleaned or newly filled pools,

place 1 to 2 AQUAPILLS per 10,000 gallons of water in the skimmer basket. To maintain pools free from visible algae growth, use 1 to 2 AQUAPILLS per 20,000 to 30,000 gallons of water, replacing them every 5 to 7 days.

Remove algae debris from the filter by regular backwashing or rinsing.

ALGAECIDE AQUAPILL 5 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. ALGAECIDE AQUAPILL 5 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required.

### STORAGE AND DISPOSAL

Store ALGAECIDE AQUAPILL 5 in a safe place. Do not remove the tape from the AQUAPILL before use. Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. After use, remove the AQUAPILL from the skimmer basket of the pool when the algaecide is expended as indicated by the complete disappearance of the amber color. Do not reuse the AQUAPILL. Dispose of the AQUAPILL in an approved landfill, or bury it in a safe place away from water supplies. Open dumping is prohibited.
