**DIRECTIONS FOR USE  
GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Decorative Fountain Algicide is used to control the growth of algae in decorative fountains. For maximum effectiveness decorative fountains containing heavy growth of algae should be cleaned prior to using Decorative Fountain Algicide.

Decorative fountains having just visible algae growth require an initial dose of 8 to 12 fluid ounces of Decorative Fountain Algicide per 1000 gallons of water. For treatment of a freshly cleaned and filled decorative fountain, add initially 4 to 8 fluid ounces of Decorative Fountain Algicide per 1,000 gallons of water. Subsequent additions of 1 to 3 fluid ounces of Decorative Fountain Algicide should be made every 5 to 7 days after initial treatment for maintenance.

Decorative Fountain Algicide is compatible with those chemicals normally used to treat decorative fountains and is effective at both acid and alkaline pH. Decorative Fountain Algicide can be used in decorative fountains treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Decorative Fountain Algicide with concentrated dry or liquid chlorine products.
