Leisure Time Chemical Corporation
5800 Ayala Avenue
Irwindale, CA 91706-6215

Attention: Keith Lewis, Ph.D.
Technical Director

Gentlemen:

Subject: Spa Products Associates Concentrated
Chlorinating Granules
EPA Registration No. 41760-5
Your Application Dated December 2, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided that you:

1. Make the following labeling revision before you release the product for shipment bearing the amended labeling.
 - Revise the ingestion statement to read "If Swallowed, drink large quantities of water. Call a physician immediately."
2. Submit the final printed labeling for inclusion in the product file.

Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

All alternate sources of supply for the active ingredient are acceptable.

SURNAME								
DATE								

The revised Confidential Statement of Formula agrees with the label and is acceptable in fulfilling our requirements in regard to the changed declared percentage for the active ingredient.

Sincerely yours,

Jeff Kempter
Product Manager (32)
Antimicrobial Program Branch
Registration Division (H7504C)

Enclosure

- DIRECTIONS FOR USE**
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- 1) Chlorinate: Add 1 oz. SPA Concentrated Chlorinating Granules per 500 gallons of water to the water prior to entering the spa. Wait 5 minutes then check chlorine residual. Residual chlorine must read between 2 to 3 ppm. If it does not, additional dosages of material should be added until it does. Once the chlorine residual is established in the 2 to 3 ppm range, the spa or hot tub may be entered.
 - 2) Maintain: SPA Concentrated Chlorinating Granules should be added daily or as necessary to maintain 2 to 3 ppm residual chlorine. Frequent checks should be made of residual chlorine using a reliable tester. The SPA Concentrated Chlorinating Granules should be broadcast over the surface of the water and allowed at least 5 minutes to circulate before sampling. Note: Heavy bather usage or the use of air or aeration may increase the chlorine demand of the spa or hot tub resulting in the need for more frequent checks of chlorine residual.
 - 3) Check pH: pH should be maintained with a reliable tester and maintained at 7.2 to 7.8 range for clean, sparkling water. pH can be increased by adding a suitable agent such as sodium bisulfate or increased by adding a suitable agent such as sodium bicarbonate. Instructions on such agents should be followed literally.
 - 4) Superchlorination: It is a good practice to superchlorinate each 2 to 4 weeks. To superchlorinate add 1 oz. of SPA Concentrated Chlorinating Granules for each 500 gallons of water. Thoroughly clean spa vacuum and cycle through filter. Resume program when chlorine residual reads 2 to 3 ppm.

Shape of Spa or Hot Tub	Dimensions in Ft.	Gal. of Water
Rectangular	Average depth x average length x average width	x 7.5
Circular	Diameter x diameter x average depth	x 5.9
Oval with straight sides	width x length	x 7
Free form	Average depth x length	x 7

STORAGE AND DISPOSAL Keep product dry in tightly closed container when not in use. Store in a cool dry well ventilated area away from heat or open flame. In case of decomposition isolate container if possible and flood with large amounts of water to dissolve all material before discarding. Do not reuse empty container. Wrap container and put in trash.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS
STRONG OXIDIZING AGENT Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.

**KEEP THIS AND ALL OTHER
CHEMICALS OUT OF REACH OF
CHILDREN FOR THEIR SAFETY**
