QUICK KILL VII

Active Ingredient:
 Lufenon salt of bromacil (5-bromo-3-sec-butyl-6-methyl-uracil)7.5%
 Inert Ingredients..... 92.5%
 EPA Reg. No. EST. No.

Keep out of reach of children.
WARNING!

Harmful or Fatal if Swallowed. Causes Eye Irritation. May
 Irritate Nose, Throat, and Skin.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS

Do not get in eyes. Avoid contact with skin and clothing. Avoid breathing vapors. Wash thoroughly with soap and water after handling and before eating and smoking.

STATEMENT OF PRACTICAL TREATMENT

If in eyes: Flush with plenty of water. Get medical attention if irritation persists.
 If on skin: Wash with plenty of soap and water. Get medical attention if irritation persists.

ENVIRONMENT HAZARDS

Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL AND CHEMICAL HAZARDS

Keep container closed when not in use. Product will freeze at temperatures below 32°F.

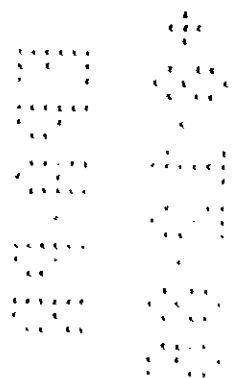

IMPORTANT — Injury to or loss of desirable trees or other plants may result from failure to observe the following: Do not apply, drain, or flush equipment on or near desirable trees or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walks, driveways, tennis courts, or similar areas. Prevent drift of spray to desirable plants. Do not contaminate domestic waters. Keep from contact with fertilizers, insecticides, fungicides and seeds. Thoroughly clean all traces of QUICK KILL VII from application equipment immediately after use. Flush tank, pump, hoses, and boom with several changes of water after removing nozzle tips and screens (clean these parts separately).

ACCEPTED

AUG 19 1986

Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
EPA Reg. No. 122950-10

GENERAL INFORMATION — QUICK KILL VII is a water soluble liquid to be sprayed undiluted on noncropland areas. It is an effective general herbicide for control of brush and many annual and perennial weeds, and is particularly useful for control of perennial grasses. Effects are slow to appear and may not become apparent until chemical has been carried into the root zone of the weeds by moisture. The degree of control and duration of control will vary with the amount of chemical applied, soil type, rainfall, and other conditions.

QUICK KILL VII is non-volatile, non-flammable, and non-corrosive to metals except aluminum. Do not use with minimum spray nozzles.

NOTICE OF WARRANTY

Seller warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. It is not possible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other plants, or the manner of use or application, all of which are beyond the control of the seller. In no case shall the seller be liable for consequential, special, or indirect damages resulting from the use or handling of this product. Such risks shall be assumed by the buyer. Seller makes no warranties of merchantability or fitness for a particular purpose nor any other express or implied warranty except as stated above.

DIRECTION FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

QUICK KILL VII should be used only in accordance with recommendations on this label, or in separate published manufacturer's recommendations available through local dealers.

Seller will not be responsible for losses or damages resulting from use of this product in any manner not specifically recommended by seller. User assumes all risk associated with such nonrecommended use.

Apply QUICK KILL VII just before or during the period of active growth of plants to be controlled when rainfall can be expected for soil activation. If dense growth is present, results will be improved if vegetation is removed before treatment. Do not apply when ground is frozen.

Before spraying, calibrate equipment to uniformly apply the product. Use a fixed-boom power sprayer properly calibrated to a constant speed and rate of delivery. For application with a hand-gun sprayer, be careful to obtain uniform distribution on the herbicide to the soil. For treating small areas, a tank-type hand sprayer may be used.

PERMANENT CONTROL: To control most weeds for an extended period of time on noncropland areas such as ROAD, HIGHWAY AND PIPELINE RIGHT-OF-WAYS, PETROLEUM TANK FARMS, LUMBERYARDS, STORAGE AREAS, AND INDUSTRIAL PLANT SITES, apply 12 to 24 gal. of QUICK KILL VII per acre to control PERMANENT WEEDS and GRASSES such as prostrategrass, cheatgrass, crabgrass, foxtail, lambsquarters, or pigweed, puncturevine, ragweed, ryegrass, turkey mullein, and wild oats. When applied just prior to or after emergence of annuals, rates as low as 8 gals. per acre control many annual weeds and grasses in low rainfall areas and give short-term control in higher rainfall areas.

Apply 24 to 48 gals. of QUICK KILL VII per acre to control PERENNIAL WEEDS and GRASSES such as bahiagrass, bluegrass, prostrategrass, dandelion, dogtunnel, goldenrod, plantain, topm smooth prairie, and wild carrot, in areas with low or seasonal rainfall, rates control many perennial weeds and grasses.

Apply 48 to 96 gals. of QUICK KILL VII per acre to control JOHNSONGRASS, and HARD-TO-KILL PERENNIAL WEEDS and GRASSES such as bermudagrass, dallisgrass, dogbane, horsetail, nutsedge, and vaseygrass. Where limited rainfall occurs during the active period, such as some areas of the West, QUICK KILL VII control of hard-to-kill, deep-rooted perennial weeds such as johnsongrass.

Use the higher levels of the dosage ranges on adsorptive soils (usually those high in clay).
Retreatment: Apply 12 to 24 gals. of QUICK KILL VII per acre when annual weeds appear on sites where weed growth has been controlled.

For small areas: 1 gal. per 1,000 square feet is approximately 44 gals. per acre.

BRUSH CONTROL: To control undesirable woody plants on noncropland areas such as RIGHT-OF-WAYS, STORAGE AREAS, INDUSTRIAL PLANT SITES, AND DRAINAGE DITCHES, apply QUICK KILL VII in summer as a broadcast or basal (soil) treatment for use on drainage ditches, apply only.

Note: For effective brush control and prevention of damage to desirable vegetation, do not standing in water; do not use water from treated ditches for irrigation; do not use water from right of ways or other sites where marketable timber or other crops are immediately adjacent to the treated area.

Broadcast Treatment: Apply 18 to 40 gals. per acre to control oak, pine, sweet gum, and other woody plants. Apply 48 to 96 gals. per acre to control brush such as American elm, cottonwood, hackberry, sumac, and other woody plants. Use higher levels of the dosage ranges on adsorptive soils (those high in organic matter).

Basal (Soil) Treatment: Apply at the rate of 2 to 4 fl. oz. per stem 2" to 4" in basal diameter. Treatment controls woody plants such as cottonwood, hackberry, maple, gum, wild cherry, willow and winged elm.

NOTICE TO BUYER: Purchase of this material does not confer any rights under patent law in the United States.

STORAGE AND DISPOSAL

1. Prohibitions: Do not contaminate water, food, or feed by storage, disposal, or dumping is prohibited. Avoid contamination of feed and food-stuff.
2. Pesticide Disposal: Pesticide or rinse water that cannot be used according to label should be disposed of according to applicable Federal, state, or local procedures.
3. Container Disposal: Triple rinse container. Then offer for recycling or record in a sanitary landfill, or by incineration if allowed by state and local authorities.
