 \underline{x} Registration

__ Reregistration

NOTICE OF PESTICIDE:

12052-7

EPA Reg.

Number

Date of Issuance:

AUG 2 2002

42052-4

Term of Issuance:

Conditional

Name of Pesticide Product:

Splash! Swimming Pool Econo-Shock

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Buckman's Inc.

c/o RegWest Company

30856 Rocky Road

Greeley, CO 80631-9375

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

- 1. Submit and/or cite all data required for registration/ reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.
- 2. Make the following label changes before you release the product for shipment:
 - a. Revise the EPA Registration Number to read, "EPA Reg. No. 42052-4".
 - b. On the front panel, change the word "Net" to read "Net Content".
 - c. Under the "Directions for Use" Statement under the heading "Swimming Pool Water Disinfection" second paragraph first sentence change "26 oz." to read "23 oz.".

Environmental Hazards

{For product packaged in containers less than 5 gallons:}

This product is toxic to fish and aquatic organisms.

{For product packaged in containers 5 gallons or greater:}

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Physical or Chemical Hazards

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine, feces, etc.) will release chlorine gas which is irritating to eyes, lungs and mucous membranes.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Note: This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

Storage and Disposal

Do not contaminate food or feed by storage, disposal or cleaning of equipment.

Storage: Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. **Disposal: If empty:** Do not reuse this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused undiluted product down any indoor or outdoor drain.

Swimming Pool Water Disinfection

For a new pool or spring start up, superchlorinate with 1 to 1.5 gallons of product for each 10,000 gallons of water to yield a 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Adjust and maintain pool water pH to between 7.2 to 7.6. Adjust and maintain the alkalinity of the pool to between 50 to 100 ppm.

To maintain the pool, add manually or by a feeder device, 26 oz. of this product for each 10,000 gallons of water to yield an available chlorine residual between 0.6 to 1.0 ppm by weight. Stabilized pools should maintain a residual of 1.0 to 1.5 ppm available chlorine. Test the pH, available chlorine residual and alkalinity of the water frequently with appropriate test kits.

Frequency of water treatment will depend upon temperature and number of swimmers. Every 7 days, or as necessary, superchlorinate the pool with 1 to 1.5 gallons of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Do not reenter pool until the chlorine residual is between 1.0 to 3.0 ppm. At the end of the swimming pool season or when water is to be drained from the pool, chlorine must be allowed to dissipate from treated pool water before discharge. Do not chlorinate the pool within 24 hours prior to discharge.

Winterizing Pools

While water is still clear and clean, apply 7 oz. of product per 1,000 gallons, while filter is running, to obtain a 3 ppm available chlorine residual, as determined by a suitable test kit. Cover pool, prepare heater, filter and heater components for winter by following manufacturers' instructions.

For Control of Algae

Initiate treatment with this product if algae growth develops resulting in a greenish growth on the pool sides and/or bottom, a slimy feel to the pool sides, or cloudiness in the pool water. Adjust pool water pH to 7.2 to 8.6. Add 2.5 gallons of this product in the evening for each 14,000 gallons of pool water. This dosage is equivalent to 10 ppm available chlorine by weight. After circulating the pool water for a minimum of four hours at 5 to 10 ppm available, chlorine, turn the pool water recirculation system off. Thoroughly brush pool sides and bottom to loosen the dead algae. Vacuum the pool the following

5/5

Splash! Swimming Pool Econo Shock Page 3 of 3

morning. Do not allow swimmers to use the pool until a chlorine residual of 1.0 to 3.0 ppm has been established. Repeat treatment as necessary.
