PRODUCT INFORMATION

Protector-L seed treatment is a ready-to-use product. Each dosage provides 0.6 ounce of thiram per bushel of seed to control seed and soil-borne fungi causing seed decay, damping-off and seedling blights. Protector-L also provides 0.2 ounce of molybdenum per bushel of seed to aid in nitrogen fixation.

SHAKE WELL BEFORE EACH USE. Planter-box Application: Use Protector-L at the rate of 4.0 fl. oz. per bushel of soybean seed (6.7 fl. oz. per 100 lbs. of soybean seed). Fill the planter-box or mixing vessel with seed, pour the required amount of Protector-L evenly on top of the seed. Stir thoroughly with a stick or paddle so that all seeds are covered. Treat only those seeds needed for immediate use, minimizing the interval between treatment and planting. Do not use excess treated seed for food, feed, or oil purposes.

Note: Regularly inspect planter plates and mechanisms and clean as required for proper seeding. At the end of each day of use, clean out the electric eye monitors according to the manufacturer's directions.
