

APPLICATION EQUIPMENT

Apply **BALAN** evenly over the turf area without skips or misses.

For best results, use equipment designed to apply herbicides or insecticides. Calibrate applicators prior to use according to the manufacturer's directions. Check frequently to be sure equipment is working properly and distributing uniformly.

PRECAUTIONS

Apply **BALAN** to prevent germination of annual weed grasses. Since the active ingredient controls established weeds, **BALAN** may be used to control annual, annual bluegrass, and annual ryegrass. Use rates at rates above 1.5 pounds active ingredient per acre. **BALAN** should not be applied to the turf of a grass planted for purposes of lawn maintenance, such as grass or fescue. Do not apply to areas of turf containing centipede grass, St. Augustine grass, or bermudagrass.

CAUTION

Keep out of swales, ditches, and streams. Avoid contact with skin, eyes, nose, mouth, or clothing. If contact, wash with water. Do not use on lawns, lawns, or feeds.

Destroy container when empty.

NON-WARRANTY Manufacturer or seller is not liable for any injury or damage caused by this product due to misuse, mishandling or any application not specifically recommended on the container.

DIRECTIONS FOR

BALAN is a pre-emergence herbicide for established turf (crabgrass, hairy crabgrass, annual bluegrass, watergrass (barnyard grass), green foxtail). **BALAN** controls annual grasses as they germinate. It does not control established grasses. When it is applied to established grasses, annual bluegrass, perennial ryegrass, and fescue grasses are not controlled.

APPLICATION

Apply **BALAN** to turf before grasses germinate. Apply it to turf before the weed grasses to be controlled are planted or seeded.

RECOMMEND

(Northern, cool season) Turf control of annual weed grasses by 1.5 to 3 pounds active ingredient per gallon of water. For smaller areas of turf use 1.5 to 3 pounds active ingredient per gallon of water.

AREA TO BE TREATED	Amount of Water
258 sq. ft.	1 gallon
340 sq. ft.	1 1/2 gallons
1,000 sq. ft.	5 gallons
4,150 sq. ft.	20 gallons
5,100 sq. ft.	25 gallons
