42177-1

1. Turn the pump on and allow the water to circulate for 24 hours.
2. Add 100 lbs of Soda Ash (Na₂CO₃) to the pool water.
3. After 24 hours, test the water for pH and Alkalinity (Total Alkalinity) at the same time. The pH should be between 7.2 and 7.6. This is essential to a good pool water. Dissolve conditioners before adding to pool water.

14. Circulates and tests continuously for 24 hours.

Your Pool is now ready for daily treatment.

TESTED
4/24/68

Directions for daily treatment:

1. Always maintain pH between 7.2 and 7.6. Check pH daily.
2. Maintain chlorine level at minimum of 1.0 ppm to 1.5 ppm. Add 1/2 cup of 5.25% bleach per 5000 gallons of water.
3. Test for chlorine residual daily.
4. On week days, add 1/2 cup of 5.25% bleach per 5000 gallons of water. On weekends, add 1 cup of 5.25% bleach per 5000 gallons of water.
5. If you are using a chlorine generator, add 1/2 cup of 5.25% bleach per 5000 gallons of water.
6. If you are using a chlorine generator, add 1/2 cup of 5.25% bleach per 5000 gallons of water.
