

DANGER:

CORROSIVE CAUSES EYE DAMAGE. PROTECT EYES WHEN HANDLING. MAY BE HARMFUL OR FATAL IF SWALLOWED. MAY CAUSE CHEMICAL BURNS. CONTACT WITH OTHER MATERIALS MAY CAUSE FIRE OR EXPLOSION OR RESULT IN DANGEROUS PRESSURE ESPECIALLY IF HEATED.

CONTACT WITH WATER OR MOIST AIR LIBERATES IRRITATING AND HAZARDOUS GASES.

FIRST AID:

IF SWALLOWED: DO NOT INDUCE VOMITING. IF NECESSARY, GIVE ORAL FLUIDS. IF NECESSARY, GIVE ORAL FLUIDS.

IF IN EYES: FLUSH EYES WITH WATER FOR AT LEAST 15 MINUTES. IF NECESSARY, GIVE ORAL FLUIDS.

IF ON SKIN: REMOVE CONTAMINATED CLOTHING. FLUSH SKIN WITH WATER FOR AT LEAST 15 MINUTES. IF NECESSARY, GIVE ORAL FLUIDS.

IF INHALED: MOVE TO FRESH AIR. IF NECESSARY, GIVE ORAL FLUIDS.

IF IN CASE OF FIRE: EXTINGUISH WITH WATER OR FOAM. IF NECESSARY, GIVE ORAL FLUIDS.

OLYMPICTM CHLORINATED TABLETS 1"

Concentrated, Stabilized

ACTIVE INGREDIENT: Trichloro-s-triazinetriene 99.0%
INERT INGREDIENTS: 1.0%
Available chlorine 90%

DANGER

KEEP OUT OF REACH OF CHILDREN

Corrosive — See first aid and precautions on side panel

NET WEIGHT: 16 lbs. (7.25 kg)

DIRECTIONS:

For swimming pools, use 1 tablet per 10,000 gallons of water.

FOR SPAS:

Use 1 tablet per 1,000 gallons of water.

For hot tubs, use 1 tablet per 1,000 gallons of water.

For swimming pools, use 1 tablet per 10,000 gallons of water.

For hot tubs, use 1 tablet per 1,000 gallons of water.

For swimming pools, use 1 tablet per 10,000 gallons of water.

For hot tubs, use 1 tablet per 1,000 gallons of water.

For swimming pools, use 1 tablet per 10,000 gallons of water.

For hot tubs, use 1 tablet per 1,000 gallons of water.

For swimming pools, use 1 tablet per 10,000 gallons of water.

For hot tubs, use 1 tablet per 1,000 gallons of water.

For swimming pools, use 1 tablet per 10,000 gallons of water.

For hot tubs, use 1 tablet per 1,000 gallons of water.

For swimming pools, use 1 tablet per 10,000 gallons of water.

For hot tubs, use 1 tablet per 1,000 gallons of water.

For swimming pools, use 1 tablet per 10,000 gallons of water.

For hot tubs, use 1 tablet per 1,000 gallons of water.

For swimming pools, use 1 tablet per 10,000 gallons of water.

For hot tubs, use 1 tablet per 1,000 gallons of water.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR SWIMMING POOLS

1. Proper conditioning of pool water is necessary to insure maximum effectiveness of Olympic 1 Tablets. Previously unconditioned pools should be treated with Olympic Stabilizer. Follow instructions on the label.
2. Adjust pool water pH to 7.2-7.6. Use Olympic PH Minus to lower pH and PH Plus to increase pH. Follow instructions on the label of the products used.
3. **SUPERCHLORINATION** is occasionally necessary to maintain a clean and algae free pool (see directions on label of Olympic Dy-Chlor II).
4. **MAINTENANCE DOSE** for every 1,000 gallons of water, put into **AUTOMATIC CHLORINATOR** 2 Olympic 1 Tablets every 7-10 days. Check pool water frequently with a test kit and maintain 1.0-1.5 PPM chlorine residual and pH of 7.2-7.5.
5. During extremely hot weather and/or heavy bathing loads additional dosage may be required. This can be achieved by adding 20 more tablets to the feeder for each 10,000 gallons of pool water. This provides 0.5 PPM additional chlorine dosage during the next 7 days. However, if immediate chlorine dosage is required, see directions on labels of Olympic Dy-Chlor II for quick adjustment of the residual chlorine to 1.1 PPM. After adjustment to 1.1 PPM residual chlorine by the addition of Dy-Chlor II, the 1 Tablets when used as directed will maintain the residual chlorine level between 1.0 and 1.5 PPM under normal use conditions.

FOR SPAS AND HOT TUBS

1. Proper conditioning of pool water is necessary to insure maximum effectiveness of Olympic 1 Tablets. Previously unconditioned pools should be treated with Olympic Stabilizer. Follow instructions on the Stabilizer label.
2. Adjust pool water pH to 7.2-7.6. Use Olympic PH Minus to lower pH and PH Plus to increase pH. Follow instructions on the label of the products used.

3. **SUPERCHLORINATE** weekly to maintain a clean and algae free pool (see directions of label of Olympic Dy-Chlor II). Check chlorine residual using a reliable test kit and enter pool only when the residual chlorine level is between 2.0 and 3.0 PPM.
 4. **MAINTENANCE DOSE** for every 1,000 gallons of water, put into an **AUTOMATIC CHLORINATOR** Olympic 1 Tablets every 7-10 days. Check pool water frequently with a test kit and maintain 2.0-3.0 PPM chlorine residual and pH of 7.2-7.5.
- NOTE:** Heavy bather usage or the use of oils or lotions may increase the chlorine demand of the pool resulting in the need for more frequent checks on chlorine residual.

HOW TO CALCULATE POOL CAPACITY

SHAPE OF POOL **GAL. OF WATER** (Dimensions in ft.)
 Rectangular Average depth X average length X average width X 7.5
 Circular Diameter X diameter X average depth X 5.9
 Oval with straight sides Ft. width X full length X average depth X 6.7
 Irregular Consult pool builder

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool dry well ventilated area away from heat or open flame. Keep contents and container dry and off wet floors. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

GENERAL NOTES

Olympic 1 Tablets are a concentrated form of chlorine designed for the chlorination of swimming pools, spas and hot tubs. Olympic 1 Tablets provide the acidity to lower the high pH of water which assists in increasing the effectiveness of residual chlorine.
