**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER: Corrosive. Causes eye damage. Protect eyes when handling. May be harmful or fatal if swallowed. May cause chemical burns. Do not get in eyes, on skin, or on clothing. Avoid breathing dust or fumes. Wash thoroughly after handling. Remove contaminated clothing promptly and wash before reuse.

PRACTICAL TREATMENT (FIRST AID): In case of contact immediately flush eyes or skin with plenty of water for at least 15 minutes. Call a physician. IF SWALLOWED, promptly drink one or two large glasses of water. DO NOT induce vomiting. Get medical attention. Avoid alcohol.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Contact with other materials may cause fire or explosion, or result in dangerous pressure, especially if heated. Contact with water or moist air liberates irritating and hazardous gases.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water when disposing of equipment washwaters. Apply this product only as specified on this label.

SPILL: Sweep up and while providing adequate ventilation, flush away by flooding with water.

IN CASE OF FIRE: Use water spray to cool containers exposed to heat and flood with water to subside material. Noxious fumes can be formed. Wear full protective clothing and self-contained breathing apparatus.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR SWIMMING POOLS

1. Proper conditioning of pool water is necessary to insure maximum effectiveness of the Chlorinated Tablets 3". Previously unconditioned pools should be treated with Pool Stabilizer. Follow instructions on the label.
2. Adjust pool water pH to 7.2-7.6. Use suitable agents such as pH Minus to lower pH and pH Plus to increase pH. Follow instructions on the label of the products used.
3. SUPERCHLORINATION is occasionally necessary to maintain a clean and algae free pool (see directions on label of Shock Treatment).
4. MAINTENANCE DOSE for every 7,000 gallons of water, put into AUTOMATIC CHLORINATOR one Chlorinated Tablets 3" every 7-10 days. Check pool water frequently with a test kit and maintain 1.0-1.5 PPM chlorine residual and pH of 7.2-7.6.
5. During extremely hot weather and/or heavy basking loads, additional dosage may be required. This can be achieved by adding 3 more tablets to the feeder for each 10,000 gallons of pool water. This provides 0.5 PPM additional chlorine dosage during the next 7 days. However, if immediate chlorine dosage is required, see directions on label of Dy-Chlor II for quick adjustment of the residual chlorine to 1.1 PPM. After adjustment to 1.1 PPM residual chlorine by the addition of Dy-Chlor II, the Chlorinated Tablets 3" when used as directed will maintain the residual chlorine level between 1.0 and 1.5 PPM under normal use conditions.
