US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS-767) WASHINGTON, DC 20460	EPA REGISTRATION NO. 42177-21	DATE OF ISSUANCE 02/22/89
NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input type="checkbox"/> REREGISTRATION (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT CHLOR-O-SPECY	
NAME AND ADDRESS OF REGISTRANT (Include ZIP code) York Chemical Corporation 3200 East Carpenter Freeway Irving, TX 75062		
NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.		
On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.		
A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.		
Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.		
Based on your response to the General Registration Standard - "Guidance for the Registration and Reregistration of Pesticide Products Containing Sodium or Calcium Hypochlorite as the Sole Active Ingredient"--issued February 1986 and revised April 1986, EPA has reregistered the product listed above in accordance with FIFRA section 2(d).		
Your amended label has been stamped approved and a copy is enclosed. You must incorporate any comments noted on your label. This label must be on products released for shipment within 1 year or by the next label printing, whichever occurs first. This label must also appear on all supplemental registrations within 1 year of this Notice of Reregistration or at the next label printing, whichever occurs first.		
Your product meets the criteria for reregistration under this Standard. Failure to comply with this Standard may result in the Agency's issuance of a Notice of Intent to Cancel the registration under FIFRA section 6(b)(1).

in EPA Letter Dated:

FEB 22 1989

Under the federal Insecticide,
Fungicide, and Rodenticide Act as
amended, for the pesticide
registered under EPA Reg. No.

OLYMPIC CHLOR-O-SHOCK

Fast-acting, liquid sanitizer
for swimming pool chlorination

ACTIVE INGREDIENT: Sodium Hypochlorite	12.5%
INERT INGREDIENTS.....	87.5%
TOTAL 100.0%	

KEEP OUT OF REACH OF CHILDREN
DANGER

See additional precautions and first aid on back panel

NET CONTENTS: 1 gallon (3.78 liters)

DANGER

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS

AND DOMESTIC ANIMALS

DANGER: Corrosive, may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk, or gelatin solution, or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without a valid discharge permit. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc. or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

DIRECTIONS FOR USE

GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR POOL CHLORINATION

To Establish a Chlorine Residual

For a new pool or for spring start-up, add 1/2 gallon of Chlor-O-Shock for each 10,000 gallons of water. Add this dosage directly to the pool, distributing uniformly over the pool

surface area. Test for chlorine residual with an accurate test kit immediately after application. Repeat dosage as necessary until a chlorine residual of 1.5 to 1.0 ppm is obtained.

Test pH with an accurate test kit and adjust, if necessary, to 7.2 to 7.6. Use an appropriate product such as pH Plus to increase pH or pH Minus to decrease pH according to label instructions. Always maintain pH within the 7.2 to 7.6 range.

Residual Maintenance/Daily Chlorination

Add one quart (32 ounces) for each 10,000 gallons of pool water daily or as needed to maintain 0.6 to 1.0 ppm residual chlorine at all times in unstabilized pools. In pools that have been stabilized with cyanuric acid, a residual chlorine of 1.0 to 1.5 ppm should be maintained at all times.

The exact amount and frequency of daily additions will vary with temperature, sunlight, bathing load, and other factors. Test pool water frequently with an accurate test kit to maintain an acceptable chlorine residual and pH level. Bathers should never be allowed in the pool when the residual chlorine is above 2.0 ppm.

Superchlorination

For effective algae control and to burn up other unwanted organic matter in pool water, it is a good practice to superchlorinate or shock treat periodically. Add 1/2 gallon of Chlor-O-Shock for each 10,000 gallons of water directly to the pool at least once a week, preferably at night or when the pool will not be in use, to temporarily increase the chlorine to approximately five times its normal level. Do not allow swimming to resume until the residual has dropped below 2.0 ppm as determined by a test kit.

NOTE: This product degrades with age. Use an accurate chlorine test kit and increase dosage as necessary to obtain the required level of available chlorine.

STORAGE AND DISPOSAL

Store this product in a cool, dry area away from direct sunlight and heat to avoid deterioration. In case of spill, flood area with large quantities of water. Product or residues that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage, disposal or cleaning of equipment.
